

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended September 30, 2018

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 333-170781

**Citius Pharmaceuticals, Inc.**

(Exact name of Registrant as specified in its Charter)

**Nevada**

(State or other jurisdiction of  
incorporation or organization)

**27-3425913**

(I.R.S. Employer  
Identification No.)

**11 Commerce Drive, First Floor, Cranford, NJ 07016**

(Address of principal executive offices) (Zip Code)

**(908) 967-6677**

(Registrant's telephone number, including area code)

(Former name and address, if changed since last report)

Securities registered pursuant to Section 12(b) of the Exchange Act:

**Common Stock, par value \$0.001 per share**  
**Warrants to purchase Common Stock**

**The NASDAQ Capital Market**  
**The NASDAQ Capital Market**

(Title or Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.  Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act.  Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past ninety (90) days.  Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendments to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input checked="" type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes  No

The aggregate market value of the voting and non-voting common equity held by non-affiliates\* computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter (March 31, 2018) was \$19.7 million.

Affiliates for the purpose of this item refers to the issuer's officers and directors and/or any persons or firms (excluding those brokerage firms and/or clearing houses and/or depository companies holding issuer's securities as record holders only for their respective clients' beneficial interest) owning 10% or more of the issuer's common stock, both of record and beneficially.

**APPLICABLE ONLY TO CORPORATE REGISTRANTS**

Indicate the number of shares outstanding of each of the registrant's classes of Common Stock, as of the latest practicable date:

17,798,791 shares as of December 1, 2018, all of one class of Common Stock, \$0.001 par value.

**DOCUMENTS INCORPORATED BY REFERENCE**

Portions of the Company's Proxy Statement for the Annual Meeting of Shareholders expected to be held on February 13, 2019 are incorporated by reference in Part III of this Report.

**Citius Pharmaceuticals, Inc.**  
**FORM 10-K**  
**September 30, 2018**

## NOTES

In this annual report on Form 10-K, and unless the context otherwise requires the “Company,” “we,” “us” and “our” refer to Citius Pharmaceuticals, Inc. and its wholly-owned subsidiaries, Citius Pharmaceuticals, LLC and Leonard-Meron Biosciences, Inc., taken as a whole.

Mino-Lok® is our registered trademark. All other trade names, trademarks and service marks appearing in this prospectus are the property of their respective owners. We have assumed that the reader understands that all such terms are source-indicating. Accordingly, such terms, when first mentioned in this prospectus, appear with the trade name, trademark or service mark notice and then throughout the remainder of this prospectus without trade name, trademark or service mark notices for convenience only and should not be construed as being used in a descriptive or generic sense.

## FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains “forward-looking statements.” Forward-looking statements include, but are not limited to, statements that express our intentions, beliefs, expectations, strategies, predictions or any other statements relating to our future activities or other future events or conditions. These statements are based on current expectations, estimates and projections about our business based, in part, on assumptions made by management. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may, and are likely to, differ materially from what is expressed or forecasted in the forward-looking statements due to numerous factors discussed from time to time in this report, including the risks described under Item 1A - “Risk Factors,” and Item 7 - “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this report and in other documents which we file with the Securities and Exchange Commission. In addition, such statements could be affected by risks and uncertainties related to:

- our ability to raise funds for general corporate purposes and operations, including our clinical trials;
- the cost, timing and results of our clinical trials;
- our ability to obtain and maintain required regulatory approvals for our product candidates;
- the commercial feasibility and success of our technology;
- our ability to recruit qualified management and technical personnel to carry out our operations; and
- the other factors discussed in the “Risk Factors” section and elsewhere in this report.

Any forward-looking statements speak only as of the date on which they are made, and, except as may be required under applicable securities laws, we do not undertake any obligation to update any forward-looking statement to reflect events or circumstances after the filing date of this report.

## PART I

### Item 1. Business

#### Overview

Citius Pharmaceuticals, Inc., headquartered in Cranford, New Jersey, is a specialty pharmaceutical company dedicated to the development and commercialization of critical care products targeting important medical needs with a focus on anti-infective products in adjunct cancer care and unique prescription products. Our goal is to achieve leading market positions by providing therapeutic products that address unmet medical needs yet have a lower development risk than is associated with new chemical entities. New formulations or combinations of previously approved drugs with substantial existing safety and efficacy data are a core focus as we seek to reduce development and clinical risks associated with drug development. Our strategy centers on products that have intellectual property and regulatory exclusivity protection, while providing competitive advantages over other existing therapeutic approaches.

The Company was founded as Citius Pharmaceuticals, LLC, a Massachusetts limited liability company, on January 23, 2007. On September 12, 2014, Citius Pharmaceuticals, LLC entered into a Share Exchange and Reorganization Agreement, with Citius Pharmaceuticals, Inc. (formerly Trail One, Inc.), a publicly traded company incorporated under the laws of the State of Nevada. Citius Pharmaceuticals, LLC became a wholly-owned subsidiary of Citius. On March 30, 2016, Citius acquired Leonard-Meron Biosciences, Inc. as a wholly-owned subsidiary. LMB was a pharmaceutical company focused on the development and commercialization of critical care products with a concentration on anti-infectives.

Since its inception, the Company has devoted substantially all of its efforts to business planning, research and development, recruiting management and technical staff, and raising capital. We are developing two proprietary products: Mino-Lok, an antibiotic lock solution used to treat patients with catheter-related bloodstream infections by salvaging the infected catheter, and a hydrocortisone-lidocaine topical formulation that is intended to provide anti-inflammatory and anesthetic relief to individuals suffering from hemorrhoids. We believe the markets for our products are large, growing, and underserved by the current prescription products or procedures.

Citius is subject to a number of risks common to companies in the pharmaceutical industry including, but not limited to, risks related to the development by Citius or its competitors of research and development stage products, market acceptance of its products, competition from larger companies, dependence on key personnel, dependence on key suppliers and strategic partners, the Company's ability to obtain additional financing and the Company's compliance with governmental and other regulations.

#### Mino-Lok<sup>®</sup>

##### Overview

Mino-Lok is a patented solution containing minocycline, disodium ethylenediaminetetraacetic acid (edetate), and ethyl alcohol, all of which act synergistically to treat and salvage infected central venous catheters ("CVCs") in patients with catheter related bloodstream infections ("CRBSIs"). Mino-Lok breaks down biofilm barriers formed by bacterial colonies, eradicates the bacteria, and provides anti-clotting properties to maintain patency in CVCs.

The administration of Mino-Lok consists of filling the lumen of the catheter with 0.8 ml to 2.0 ml of Mino-Lok solution. The catheter is then "locked", meaning that the solution remains in the catheter without flowing into the vein. the lock is maintained for a dwell-time of two hours while the catheter is not in use. If the catheter has multiple lumens, all lumens may be locked with the Mino-Lok solution either simultaneously or sequentially. If patients are receiving continuous infusion therapy, the catheters alternate between being locked with the Mino-Lok solution and delivering therapy. The Mino-Lok therapy is two hours per day for at least five days, usually with two additional locks in the subsequent two weeks. After locking the catheter for two hours, the Mino-Lok solution is aspirated, and the catheter is flushed with normal saline. At that time, either the infusion will be continued, or will be locked with the standard-of-care lock solution until further use of the catheter is required. In a clinical study conducted by MD Anderson Cancer Center ("MDACC"), there were no serum levels of either minocycline or edetate detected in the sera of several patients who underwent daily catheter lock solution with minocycline and edetate ("M-EDTA") at the concentration level proposed in Mino-Lok treatment. Thus, it has been demonstrated that the amount of either minocycline or edetate that leaks into the serum is very low or none at all.

## Phase 2b Results

From April 2013 to July 2014, 30 patients with CVC-related bloodstream infection were enrolled at MDACC in a prospective Phase 2b study. Patients received Mino-Lok therapy for two hours once daily for a minimum of five days within the first week followed by two additional locks within the next two weeks. Patients were followed for one month post lock therapy. Demographic information, clinical characteristics, laboratory data, therapy, as well as adverse events and outcome were collected for each patient. Median age at diagnosis was 56 years (range: 21-73 years). In all patients, prior to the use of lock therapy, systemic treatment with a culture-directed, first-line intravenous antibiotic was started. Microbiological eradication was achieved at the end of therapy in all cases. None of the patients experienced any serious adverse event related to the lock therapy.

The active arm, which is the Mino-Lok treated group of patients, was then compared to 60 patients in a matched cohort that experienced removal and replacement of their CVCs within the same contemporaneous timeframe. The patients were matched for cancer type, infecting organism, and level of neutropenia. All patients were cancer patients and treated at the MDACC. The efficacy of Mino-Lok therapy was 100% in salvaging CVCs, demonstrating equal effectiveness to removing the infected CVC and replacing with a new catheter.

The main purpose of the study was to show that Mino-Lok therapy was at least as effective as the removal and replacement of CVCs when CRBSIs are present, and that the safety was better, that is, the complications of removing an infected catheter and replacing with a new one could be avoided. In addition to having a 100% efficacy rate with all CVCs being salvaged, Mino-Lok therapy had no significant adverse events ("SAEs"), compared to an 18% SAE rate in the matched cohort where patients had the infected CVCs removed and replaced ("R&R") with a fresh catheter. There were no overall complication rates in the Mino-Lok arm group compared to 11 patients with events (18%) in the control group. These events included bacterial relapse (5%) at four (4) weeks post-intervention, and a number of complications associated with mechanical manipulation in the removal or replacement procedure for the catheter (10%) or development of deep seated infections such as septic thrombophlebitis and osteomyelitis (8%). As footnoted, six (6) patients had more than one (1) complication in the control arm group.

### ***Phase 3 Initiation***

In November 2016, the Company initiated site recruitment for Phase 3 clinical trials. From initiation through first quarter 2017, the Company received input from several sites related to the control arm as being less than standard of care for some of the respective institutions. The Company worked closely with the U.S. Food and Drug Administration (“FDA”) with respect to the design of the phase 3 trial, and received feedback on August 17, 2017. The FDA stated that they recognized that there is an unmet medical need in salvaging infected catheters and agreed that an open label, superiority design would address the Company’s concerns and would be acceptable to meet the requirements of a new drug application. The Company amended the phase 3 study design to remove the saline and heparin placebo control arm and to use an active control arm that conforms with today’s current standard of care. Patient enrollment commenced in February 2018.

The Mino-Lok Phase 3 Trial is planned to enroll 700 patients in 50 participating institutions, all located in the U.S. There will be interim analyses at both the 50% and 75% points of the trial as measured by the number of patients treated. As of December 2018, there are 20 active sites currently enrolling patients including such academic centers as MD Anderson Cancer Center, Henry Ford Health Center, Georgetown University Medical Center, University of Chicago, and others. There are 15 additional well renowned medical centers in startup mode. When these study centers are activated, site recruitment will have reached 75% of the target institutions planned; and there are another 30 centers in feasibility stage as of December 1, 2018.

### ***Fast Track Designation***

In October 2017, the Company received official notice from FDA that the investigational program for Mino-Lok was granted “Fast Track” status. Fast Track is a designation that expedites FDA review to facilitate development of drugs which treat a serious or life-threatening condition and fill an unmet medical need. A drug that receives Fast Track designation is eligible for the following:

- More frequent meetings with FDA to discuss the drug’s development plan and ensure collection of appropriate data needed to support drug approval;
- More frequent written correspondence from FDA about the design of the clinical trials;
- Priority review to shorten the FDA review process for a new drug from ten months to six months; and,
- Rolling review, which means Citius can submit completed sections of its New Drug Application (“NDA”) for review by FDA, rather than waiting until every section of the application is completed before the entire application can be reviewed.

### ***Mino-Lok International Study***

In October 2017, data from an international study on Mino-Lok was presented at the Infectious Disease Conference, (“ID Week”), in San Diego, California. The 44 patient study was conducted in Brazil, Lebanon, and Japan and showed Mino-Lok therapy was an effective intervention to salvage long term, infected central venous catheters (CVCs) in catheter related bloodstream infections in patients who had cancer with limited vascular access. This study showed 95% effectiveness for Mino-Lok therapy in achieving microbiological eradication of the CVCs as compared to 83% for the control.

### ***Stability Patent Application for Mino-Lok***

In July 2018, the Company received notice from the MD Anderson Cancer Center that the U.S. Patent and Trademark Office has reviewed and examined the patent application US 2017/051373 A1 and that it is allowed for issuance as a patent. The new invention overcomes limitations in mixing antimicrobial solutions in which components have precipitated because of physical and/or chemical factors, thus limiting the stability of the post-mix solutions.

Citius holds the exclusive worldwide license which provides access to this patented technology for development and commercialization of Mino-Lok.

## Market Opportunity

In spite of best clinical practice, catheters contribute to approximately 70% of blood stream infections that occur in the ICU, or are associated with hemodialysis or cancer patients (approximately 470,000 per year). Bacteria enter the catheter either from the skin or intraluminally through the catheter hub. Once in the catheter, bacteria tend to form a protective biofilm on the interior surface of the catheter that is resistant to most antimicrobial solutions. The most frequently used maintenance flush, heparin, actually stimulates biofilm formation. Heparin is widely used as a prophylactic lock solution, in spite of the evidence that it contributes to the promotion of biofilm formation. The formation of bacterial biofilm usually precedes CRBSIs.

The SOC in the management of CRBSI patients consists of removing the infected CVC and replacing it with a new catheter at a different vascular access site. However, in cancer and hemodialysis patients with long-term surgically implantable silicone catheters, removal of the CVC and reinsertion of a new one at a different site might be difficult, or even impossible, because of the unavailability of other accessible vascular sites and the need to maintain infusion therapy. Furthermore, critically ill patients with short-term catheters often have underlying coagulopathy, which makes reinsertion of a new CVC at a different site, in the setting of CRBSIs, risky in terms of mechanical complications, such as pneumothorax, misplacement, or arterial puncture. Studies have also revealed that CRBSI patients may be associated with serious complications, including septic thrombosis, endocarditis and disseminated infection, particularly if caused by *Staphylococcus aureus* or *Candida* species. Furthermore, catheter retention in patients with CRBSIs is associated with a higher risk of relapse and poor response to antimicrobial therapy.

According to Maki et al., published in the *Mayo Clinic Proceedings* in 2006, there are approximately 250,000 CRBSIs annually in the U.S. Subsequent to this study, our estimates have ranged upwards to over 450,000 CLABSIs annually (see analysis in the table below). CRBSIs are associated with a 12% to 35% mortality rate and an attributable cost of \$35,000 to \$56,000 per episode.

We estimate that the potential market for Mino-Lok in the U.S. to be approximately \$500 million to \$1 billion as shown in the table below based on a target price of up to \$300 per dose of each salvage flush treatment.

	<b>Short-Term CVC</b>	<b>Long-Term CVC</b>	<b>Total</b>
<b>No. of Catheters</b>	3 million	4 million	7 million
<b>Avg. Duration (Days)</b>	12	100	N/A
<b>Catheter Days</b>	36 million	400 million	436 million
<b>Infection Rate</b>	2/1,000 days	1/1,000 days	N/A
<b>Catheters Infected</b>	72,000	400,000	472,000
<b>Flushes/Catheter</b>	5	7	6.7
<b>Total Salvage Flushes</b>	360,000	2,800,000	3,160,000

Sources: *Ann Intern Med* 2000; 132:391-402, *Clev Clin J Med* 2011; 78(1):10-17, *JAVA* 2007; 12(1):17-27, *J Inf Nurs* 2004;27(4):245-250, *Joint Commission website Monograph, CLABSI and Internal Estimates*.

Under various plausible pricing scenarios, we believe that Mino-Lok would be cost saving to the healthcare system given that the removal of an infected CVC and replacement of a new catheter in a different venous access site is estimated by the Company to cost between \$8,000 and \$10,000. Furthermore, there are potential additional medical benefits, a reduction in patient discomfort and avoidance of serious adverse events with the Mino-Lok approach since the catheter remains in place and is not subject to manipulation. We believe there will be an economic argument to enhance the adoption of Mino-Lok by infection control committees at acute care institutions.

In January of 2017, the Company commissioned a primary market research study with MEDACore, a subsidiary of Leerink, a healthcare focused network with more than 35,000 healthcare professionals, including key opinion leaders, experienced practitioners and other healthcare professionals throughout North America, Europe, Asia and other locations around the world. This network includes approximately 55 clinical specialties, 21 basic sciences and 20 business specialties. As part of this market research project, the Company commissioned a third party survey of 31 physicians to qualify the need for catheter salvage in patients with infected, indwelling central venous lines, especially when the catheter is a tunneled or an implanted port. There were 19 infectious disease experts and 12 intensivists surveyed who all agreed that salvage would be preferable to catheter exchange to avoid catheter misplacements, blood clots, or vessel punctures that can potentially occur during reinsertion. Most were also concerned that viable venous access may not be available in patients who were vitally dependent on a central line.

## **Hydro-Lido**

### ***Overview***

Hydro-Lido is a topical formulation of hydrocortisone and lidocaine that is intended for the treatment of hemorrhoids. To our knowledge, there are currently no FDA-approved prescription drug products for the treatment of hemorrhoids. Some physicians are known to prescribe topical steroids for the treatment of hemorrhoids. In addition, there are various strengths of topical combination prescription products containing hydrocortisone along with lidocaine or pramoxine, each a topical anesthetic, that are prescribed by physicians for the treatment of hemorrhoids. These products contain drugs that were in use prior to the start of the Drug Efficacy Study Implementation (“DESI”) program and are commonly referred to as DESI drugs. However, none of these single-agent or combination prescription products have been clinically evaluated for safety and efficacy and approved by the FDA for the treatment of hemorrhoids. Further, many hemorrhoid patients use over the counter (“OTC”) products as their first line therapy. OTC products contain any one of several active ingredients including glycerin, phenylephrine, pramoxine, white petrolatum, shark liver oil and/or witch hazel, for symptomatic relief.

### ***Development of Hemorrhoids Drugs***

Hemorrhoids are a common gastrointestinal disorder, characterized by anal itching, pain, swelling, tenderness, bleeding and difficulty defecating. In the U.S., hemorrhoids affect nearly 5% of the population, with approximately 10 million persons annually admitting to having symptoms of hemorrhoidal disease. Of these persons, approximately one third visit a physician for evaluation and treatment of their hemorrhoids. The data also indicate that for both sexes a peak of prevalence occurs from age 45 to 65 years with a subsequent decrease after age 65 years. Caucasian populations are affected significantly more frequently than African Americans, and increased prevalence rates are associated with higher socioeconomic status in men but not women. Development of hemorrhoids before age 20 is unusual. In addition, between 50% and 90% of the general U.S., Canadian and European population will experience hemorrhoidal disease at least once in life. Although hemorrhoids and other anorectal diseases are not life-threatening, individual patients can suffer from agonizing symptoms which can limit social activities and have a negative impact on the quality of life.

Hemorrhoids are defined as internal or external according to their position relative to the dentate line. Classification is important for selecting the optimal treatment for an individual patient. Accordingly, physicians use the following grading system referred to as the Goligher’s classification of internal hemorrhoids:

- |           |  |
|-----------|--|
| Grade I   | Hemorrhoids not prolapsed but bleeding.  |
| Grade II  | Hemorrhoids prolapse and reduce spontaneously with or without bleeding.  |
| Grade III | Prolapsed hemorrhoids that require reduction manually.   |
| Grade IV  | Prolapsed and cannot be reduced including both internal and external hemorrhoids that are confluent from skin tag to inner anal canal. |

### *Development Activities to Date*

In the fall of 2015, we completed dosing patients in a double-blind dose ranging placebo controlled Phase 2a study where six different formulations containing hydrocortisone and lidocaine in various strengths (“CITI-001”) were tested against the vehicle control. The objectives of this study were to: 1) demonstrate the safety and efficacy of the formulations when applied twice daily for two weeks in subjects with Grade I or II hemorrhoids and 2) assess the potential contribution of lidocaine hydrochloride and hydrocortisone acetate, alone or in combination for the treatment of symptoms of Goligher’s Classification Grade I or II hemorrhoids.

Symptom improvement was observed based on a global score of disease severity (“GSDS”), and based on some of the individual signs and symptoms of hemorrhoids, specifically itching and overall pain and discomfort. Within the first few days of treatment, the combination products (containing both hydrocortisone and lidocaine) were directionally favorable versus the placebo and their respective individual active treatment groups (e.g., hydrocortisone or lidocaine alone) in achieving ‘almost symptom free’ or ‘symptom free’ status according to the GSDS scale. These differences suggest the possibility of a benefit for the combination product formulation.

Overall, results from adverse event reporting support the safety profile of all test articles evaluated in this study and demonstrate similar safety profiles as compared to the vehicle. The safety findings were unremarkable. There was a low occurrence of adverse events and a similar rate of treatment related adverse events across all treatment groups. The majority of adverse events were mild and only one was severe. None of the adverse events were serious and the majority of adverse events were recovered/resolved at the end of the study. There were only two subjects who were discontinued from the study due to adverse events.

In addition to the safety and dose-ranging information, information was obtained relating to the use of the GSDS as an assessment tool for measuring the effectiveness of the test articles. Individual signs and symptoms were also assessed but can vary from patient to patient. Therefore, the goal of the GSDS was to provide an assessment tool that could be used for all patients regardless of which signs and symptoms they are experiencing. The GSDS proved to be a more effective tool for assessing the severity of the disease and the effectiveness of the drug when compared to the assessment of the individual signs and symptoms. Citius believes that we can continue to develop this assessment tool as well as other patient reported outcome endpoints for use in the next trials and in the pivotal trial.

Information was also obtained about the formulation of the drug and the vehicle. As a result of this study, we believe that the performance of the active arms of the study relative to the vehicle can be improved by re-formulating our topical preparation. Therefore, we have initiated work on vehicle formulation and evaluation of higher potency steroids.

In June and July 2016, the Company engaged the Dominion Group, a leading provider of healthcare and pharmaceutical marketing research services. The primary market research was conducted to understand the symptoms that are most bothersome to patients better in order to develop meaningful endpoints for the clinical trials. We also learned about the factors that drive patients to seek medical attention for hemorrhoids in an effort to understand the disease impact on quality of life. The results of this survey are able to help us develop patient reported outcome evaluation tools. These tools can be used in clinical trials to evaluate the patients’ conditions and to assess the performance of the test articles.

In March 2018, we announced that we are selecting a higher potency corticosteroid in our steroid/anesthetic topical formulation program for the treatment of hemorrhoids. The original topical preparation, CITI-001, which was used in the Phase 2a study, was a combination of hydrocortisone acetate and lidocaine hydrochloride. The new formulation, CITI-002, which we refer to as Halo-Lido, will combine lidocaine with the higher potency corticosteroid for symptomatic relief of the pain and discomfort of hemorrhoids.

We held a Type C meeting with the FDA in December 2017 to discuss the results of the Phase 2a study and to obtain the FDA’s view on development plans to support the potential formulation change for the planned Phase 2b study. We also requested the FDA’s feedback on our Phase 2b study design, including target patient population, inclusion/exclusion criteria, and efficacy endpoints. The pre-clinical and clinical development programs for CITI-002 are planned to be similar to those conducted for the development of CITI-001 to support the design for a planned Phase 3 clinical trial.

### ***Market Opportunity***

The current market for OTC and topical prescription (“Rx”) products for the symptomatic treatment of hemorrhoids is highly fragmented, and includes approximately 20 million units of OTC and over 4 million prescriptions. None of the Rx products have received FDA approval and are only available due to the Drug Efficacy Study Implementation (“DESI”) program, which started decades ago after enactment of the 1962 Kefauver-Harris Drug Amendments. These DESI products have no FDA reviewed evidence of efficacy or safety, and may be subject to withdrawal if an approved product were to be introduced. Several topical combination prescription products for the treatment of hemorrhoids are available containing hydrocortisone in strengths ranging from 0.5% to 3.0%, combined with lidocaine in strengths ranging from 1.0% to 3.0%. The various topical formulations include creams, ointments, gels, lotions, enemas, pads, and suppositories. The most commonly prescribed topical combination gel is sold as a branded generic product and contains 2.5% hydrocortisone and 3.0% lidocaine.

We believe there are currently no FDA-approved prescription drug products for the treatment of hemorrhoids. Although there are numerous Rx and OTC products commonly used to treat hemorrhoids, none possess proven safety and efficacy data generated from rigorously conducted clinical trials. We believe that a novel topical formulation of hydrocortisone and lidocaine designed to provide anti-inflammatory and anesthetic relief and which has an FDA-approved label specifically claiming the treatment of hemorrhoids will become an important treatment option for physicians who want to provide their patients with a therapy that has demonstrated safety and efficacy in treating this uncomfortable and often recurring disease. We believe that our CITI-002 product represents an attractive, low-risk product opportunity with meaningful upside potential.

### ***Market Exclusivity***

We believe that we will be the first company to conduct rigorous clinical trials and receive FDA approval of a topical hydrocortisone-lidocaine combination product for the treatment of hemorrhoids. If we receive FDA approval, we will qualify for 3 years of market exclusivity for our dosage strength and formulation. In addition, we will also be the only product on the market specifically proven to be safe and effective for the treatment of hemorrhoids. Generally, if a company conducts clinical trials and receives FDA approval of a product for which there are similar, but non FDA-approved, prescription products on the market, the manufacturers of the unapproved but marketed products are required to withdraw them from the market. However, the FDA has significant latitude in determining how to enforce its regulatory powers in these circumstances. We have not had any communication with the FDA regarding this matter and cannot predict what action, if any, the FDA will take with respect to the unapproved products.

We believe that should our product receive an FDA approval and demonstrate, proven safety and efficacy data, and if our products obtain 3 years of market exclusivity based on our dosage strength and formulation, we are likely to have a meaningful advantage in our pursuit of achieving a significant position in the market for topical combination prescription products for the treatment of hemorrhoids.

### ***Sales and Marketing***

We are primarily focused on identifying opportunities within the critical care and cancer care market segments. In our product acquisition criteria, we concentrate on markets that are highly influenced by key opinion leaders (KOLs) and have products that are prescribed by a relatively small number of physicians, yet provide large opportunities for growth and market share. This strategy allows for a manageable commercialization effort for our Company in terms of resources and capital. We also seek to provide cost-effective therapies that would be endorsed by payers, patients, and providers. We believe that we will be able to commercialize products within the scope of these criteria ourselves, and that we can create marketing synergies by having a common narrow audience for our marketing efforts (“several products in the bag for the same customer”).

For products that we own that fall out of the narrow scope criteria, we have identified pharmaceutical companies with large sales forces, experienced sales and marketing management teams, direct-to-consumer (“DTC”) capabilities, significantly larger resources than ours, and non-competing product portfolios that we believe would make excellent sales and marketing partners for us. We intend to license our mass audience, non-specialty products to such companies for sales and marketing.

## **Intellectual Property**

We rely on a combination of patent, trade secret, copyright, and trademark laws, as well as confidentiality, licensing and other agreements, to establish and protect our proprietary rights. Our policy is to actively seek to obtain, where appropriate, the broadest intellectual property protection possible for our current product candidates and any future product candidates both in the U.S. and abroad. However, patent protection may not provide us with complete protection against competitors who seek to circumvent our patents. To help protect our proprietary know-how that is not patentable, and for inventions for which patents may be difficult to enforce, we currently rely and will in the future rely on trade secret protection and confidentiality agreements to protect our interests.

### ***Mino-Lok Intellectual Property***

Mino-Lok is covered by an issued U.S. patent (no. 7,601,731), “Antimicrobials in Combination with Chelators and Ethanol for the Rapid Eradication of Microorganisms Embedded in Biofilm,” which was issued on October 13, 2009. This patent is a composition of matter patent and provides intellectual property protection until June 7, 2024. There are corresponding applications pending in Europe and Canada (European Application No. EP 1644024; Canadian Patent Application No. 0252852). On April 15, 2014, a patent application was filed for an enhanced formulation that provides greater stability of the reconstituted Mino-Lok solution. In June 2017, the Company was notified that US Patent Application 15/344,113 has been published by the US Patent Office with a publication date of June 1, 2017. This patent is a step forward for Mino-Lok as it overcomes limitations in mixing antimicrobial solutions where components may precipitate because of physical and/or chemical factors, thus limiting the stability of the post-mix solutions.

In July 2018, the Company received notice from the MD Anderson Cancer Center that the U.S. Patent and Trademark Office has reviewed and examined the patent application US 2017/051373 A1 and that it is allowed for issuance as a patent. The new invention overcomes limitations in mixing antimicrobial solutions in which components have precipitated because of physical and/or chemical factors, thus limiting the stability of the post-mix solutions.

On May 14, 2014, LMB entered into a patent and technology license agreement with Novel Anti-Infective Therapeutics, Inc. (“NAT”) to develop and commercialize Mino-Lok on an exclusive, worldwide (except for South America), sub licensable basis. LMB incurred a one-time license fee in May 2014. On March 20, 2017, LMB entered into an amendment to the license agreement that expanded the licensed territory to include South America, providing LMB with worldwide rights. Under the license agreement, the Company will pay (i) an annual maintenance fee until commercial sales of a product subject to the license, (ii) upon commercialization, we will pay annual royalties on net sales of licensed products, and (iii) certain regulatory and milestone payments. Unless earlier terminated by NAT based on the failure to achieve certain development or commercial milestones, the license agreement remains in effect until the date that all patents licensed under the agreement have expired and all patent applications within the licensed patent rights have been cancelled, withdrawn or expressly abandoned.

Mino-Lok has received a Qualified Infectious Disease Product (“QIDP”) designation. The QIDP designation provides New Drug Applications an additional five years of market exclusivity, which together with the potential three years of exclusivity for the new strength and formulation of Mino-Lok, would result in a combined total of eight years of market exclusivity regardless of patent protection

### ***Hydro-Lido Intellectual Property***

We are developing a new formulation of Hydro-Lido, CITI-002, which will have a unique combination of excipients as well as unique concentrations of the active ingredients. The goal is to have a product that is optimized for stability and activity. Once the formulation development is completed and data is obtained, we intend to apply for a patent on this new topical formulation.

We seek to achieve approval for Hydro-Lido by utilizing the FDA’s 505(b)(2) pathway. This pathway will provide 3 years of market exclusivity.

## Competition

We operate in a highly competitive and regulated industry which is subject to rapid and frequent changes. We face significant competition from organizations that are pursuing drugs that would compete with the drug candidates that we are developing and the same or similar products that target the same conditions we intend to treat. Due to our limited resources, we may not be able to compete successfully against these organizations, which include many large, well-financed and experienced pharmaceutical and biotechnology companies, as well as academic and research institutions and government agencies.

### *Mino-Lok Competition*

Currently, the only alternative to Mino-Lok in the treatment of infected CVCs in CRBSI/CLABSI patients of which we are aware, is the SOC of removing the culprit CVC and replacing a new CVC at a different vascular site. Citius is not aware of any Investigational New Drug Applications (“INDs”) for a salvage antibiotic lock solution and does not expect any to be forthcoming due to the difficulty of meeting the necessary criteria to be effective and practical.

At this time, there are no pharmacologic agents approved in the U.S. for the prevention or treatment of CLABSIs in central venous catheters. Citius is aware that there are several agents in development for prevention but none for salvage. The most prominent of these appear to be Neutrolin from CorMedix and B-Lock from Great Lakes Pharmaceuticals, Inc. (“GLP”).

#### *Neutrolin<sup>®</sup> (CorMedix Inc.)*

Neutrolin is a formulation of Taurolidine 1.35%, Citrate 3.5%, and Heparin 1000 units/mL. Neutrolin is an anti-microbial catheter lock solution being developed by CorMedix to prevent CRBSIs and to prevent clotting. In January 2015, the U.S. Food and Drug Administration (the “FDA”) granted Fast Track and Qualified Infectious Disease Product (“QIDP”) designations for Neutrolin. In December 2015, CorMedix initiated its Phase 3 clinical trial in hemodialysis patients in the United States. The clinical trial named Catheter Lock Solution Investigational Trial, or LOCK-IT-100 is a prospective, multicenter, randomized, double-blind, placebo-controlled, active control trial designed to show efficacy and safety of Neutrolin in preventing CRBSIs in subjects receiving hemodialysis therapy. On April 20, 2017, CorMedix provided an update on the LOCK-IT-100 trial. CorMedix had enrolled 368 patients to date and completed a safety review by an independent Data and Safety Monitoring Board (“DSMB”) of the first 279 patients. The DSMB concluded that it was safe to continue the trial as designed; however, CorMedix initiated discussions with the FDA to make some protocol changes to include one or more interim efficacy analyses. According to CorMedix, the FDA accepted the CorMedix proposal.

On June 20, 2018, CorMedix announced that it had completed its review and source-verification of the data required for the interim analysis of the Phase 3 LOCK-IT-100 study for Neutrolin<sup>®</sup>. The data was then locked and transferred to the independent biostatistician for un-blinding and analysis, who then provided the results to the independent Data Safety Monitoring Board (DSMB) for its review.

On July 25, 2018 CorMedix announced that the independent Data Safety Monitoring Board (DSMB) had completed its review of the interim analysis of the data from the currently ongoing Phase 3 LOCK-IT-100 study for Neutrolin<sup>®</sup>. Because the pre-specified level of statistical significance was reached and efficacy had been demonstrated, the DSMB recommended the study be terminated early. No safety concerns were reported by the DSMB based on the interim analysis. The company will submit the results of the interim analysis to the U.S. Food and Drug Administration for its review.

### *B-Lock™ (Great Lakes Pharmaceuticals, Inc.)*

B-Lock is a triple combination of trimethoprim, EDTA and ethanol from Great Lakes Pharmaceuticals, Inc. (“GLP”). On July 24, 2012, GLP announced the initiation of a clinical study of B-Lock. We are unaware as to the progress or results of these studies. In addition, we are not aware of any IND being filed in the US for B-Lock, nor are we aware of any clinical studies to support salvage of infected catheters in bacteremic patients.

Neither of these lock solutions have been shown to be effective in salvaging catheters in bacteremic patients as Mino-Lok is intended to do, and Citius does not expect that either would be pursued for this indication.

There has been no further public information available on GLP. GLP’s web site and phone number are no longer active and the Company believes that they have ceased operations.

### ***Hydro-Lido Competition***

The primary competition in the hemorrhoid market is non-prescription over the counter products. When approved, Hydro-Lido will be the only prescription product for the treatment of hemorrhoids.

### **Supply and Manufacturing**

We do not currently have and we do not intend to set up our own manufacturing facilities. We expect to use approved contract manufacturers for manufacturing our products in all stages of development after we file for FDA approval. Each of our domestic and foreign contract manufacturing establishments, including any contract manufacturers we may decide to use, must be listed in the New Drug Application (“NDA”) and must be registered with the FDA. Also, the FDA imposes substantial annual fees on manufacturers of branded products.

In general, our suppliers purchase raw materials and supplies on the open market. Substantially all such materials are obtainable from a number of sources so that the loss of any one source of supply would not have a material adverse effect on us.

If we elect to conduct product development and manufacturing, we will be subject to regulation under various federal and state laws, including the Occupational Safety and Health Act, the Environmental Protection Act, the Toxic Substances Control Act, the Resource Conservation and Recovery Act, the Controlled Substances Act and other present and potential future federal, state or local regulations.

We have contracted with proven suppliers and manufacturers for active pharmaceutical ingredient, development and packaging. We are confident that all materials meet or will meet specifications discussed at the chemistry, manufacturing and controls meeting with the FDA.

### **Regulatory Strategy**

#### ***United States Government Regulation***

The research, development, testing, manufacture, labeling, promotion, advertising, distribution and marketing, among other things, of our products are extensively regulated by governmental authorities in the United States and other countries. Our products may be classified by the FDA as a drug or a medical device depending upon the indications for use or claims. Because certain of our product candidates are considered as medical devices and others are considered as drugs for regulatory purposes, we intend to submit applications to regulatory agencies for approval or clearance of both medical device and pharmaceutical product candidates.

In the United States, the FDA regulates drugs and medical devices under the Federal Food, Drug, and Cosmetic Act and the agency’s implementing regulations. If we fail to comply with the applicable United States requirements at any time during the product development process, clinical testing, and the approval process or after approval, we may become subject to administrative or judicial sanctions. These sanctions could include the FDA’s refusal to approve pending applications, license suspension or revocation, withdrawal of an approval, warning letters, adverse publicity, product recalls, product seizures, total or partial suspension of production or distribution, injunctions, fines, civil penalties or criminal prosecution. Any agency enforcement action could have a material adverse effect on our company.

## ***Foreign Regulatory Requirements***

We and any collaborative partners may be subject to widely varying foreign regulations, which may be different from those of the FDA, governing clinical trials, manufacture, product registration and approval and pharmaceutical sales. Whether or not FDA approval has been obtained, we or our collaboration partners must obtain a separate approval for a product by the comparable regulatory authorities of foreign countries prior to the commencement of product marketing in such countries. In certain countries, regulatory authorities also establish pricing and reimbursement criteria. The approval process varies from country to country, and the time may be longer or shorter than that required for FDA approval. In addition, under current United States law, there are restrictions on the export of products not approved by the FDA, depending on the country involved and the status of the product in that country.

International sales of medical devices manufactured in the U.S. that are not approved by the FDA for use in the U.S., or are banned or deviate from lawful performance standards, are subject to FDA export requirements. Exported devices are subject to the regulatory requirements of each country to which the device is exported. Some countries do not have medical device regulations, but in most foreign countries, medical devices are regulated. Frequently, regulatory approval may first be obtained in a foreign country prior to application in the U.S. to take advantage of differing regulatory requirements. Most countries outside of the U.S. require that product approvals be recertified on a regular basis, generally every 5 years. The recertification process requires that we evaluate any device changes and any new regulations or standards relevant to the device and conduct appropriate testing to document continued compliance. Where recertification applications are required, they must be approved in order to continue selling our products in those countries.

In the European Union, in order for a product to be marketed and sold, it is required to comply with the Medical Devices Directive and obtain CE Mark certification. The CE Mark certification encompasses an extensive review of the applicant's quality management system which is inspected by a notified body's auditor as part of a stage 1 and 2 International Organization for Standardization ("ISO") 13485:2016 audit, in accordance with worldwide recognized ISO standards and applicable European Medical Devices Directives for quality management systems for medical device manufacturers. Once the quality management system and design dossier has been successfully audited by a notified body and reviewed and approved by a competent authority, a CE certificate for the medical device will be issued. Applicants are also required to comply with other foreign regulations such as the requirement to obtain Ministry of Health, Labor and Welfare approval before a new product can be launched in Japan. The time required to obtain these foreign approvals to market our products may vary from U.S. approvals, and requirements for these approvals may differ from those required by the FDA.

Medical device laws and regulations are in effect in many of the countries in which we may do business outside the United States. These laws and regulations range from comprehensive device approval requirements for our medical device product to requests for product data or certifications. The number and scope of these requirements are increasing. We may not be able to obtain regulatory approvals in such countries and may be required to incur significant costs in obtaining or maintaining its foreign regulatory approvals. In addition, the export of certain of our products which have not yet been cleared for domestic commercial distribution may be subject to FDA export restrictions. Any failure to obtain product approvals in a timely fashion or to comply with state or foreign medical device laws and regulations may have a serious adverse effect on our business, financial condition or results of operations.

## **Employees**

As of September 30, 2018, we had seven employees and various consultants providing support. Through our consulting and collaboration arrangements, and including our Scientific Advisory Board, we have access to more than 30 additional professionals, who possess significant expertise in business development, legal, accounting, regulatory affairs, clinical operations and manufacturing. We also rely upon a network of consultants to support our clinical studies and manufacturing efforts.

## Executive Officers of Citius

**Myron Holubiak**, President, Chief Executive Officer and Director – Mr. Holubiak, 71, was appointed President, Chief Executive Officer and Director in March 2016. He previously served as a Director of Citius since October 2015 and was the founder and Chief Executive Officer and President of Leonard-Meron Biosciences, Inc., an acquired subsidiary of Citius, from March 2013 until March 2016.

**Leonard Mazur**, Executive Chairman and Secretary – Mr. Mazur, 73, has been a member of the Board since September 2014. Mr. Mazur previously served as Chief Executive Officer, President, and Chief Operating Officer from September 2014 until March 2016.

**Jaime Bartushak**, Chief Financial Officer and Principal Financial Officer – Mr. Bartushak, 51, was appointed as Chief Financial Officer in November 2017. Previously, he was one of the founders and Chief Financial Officer of Leonard-Meron Biosciences, Inc., an acquired subsidiary of Citius,

## Other Information

We make available, free of charge through our website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as is reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (the “SEC”) pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). The SEC maintains an Internet site that contains these reports at [www.sec.gov](http://www.sec.gov).

Our website address is <http://www.citiuspharma.com>. The information contained in, or that can be accessed through, our website is not part of this report.

## Item 1A. Risk Factors

*This report contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those discussed in this report. Factors that could cause or contribute to these differences include, but are not limited to, those discussed below and elsewhere in this report and in any documents incorporated in this report by reference.*

*If any of the following risks, or other risks not presently known to us or that we currently believe to not be significant, develop into actual events, then our business, financial condition, results of operations or prospects could be materially adversely affected. If that happens, the market price of our common stock could decline, and stockholders may lose all or part of their investment.*

### Risks related to our Business and our Industry

*We have a history of net losses and expect to incur losses for the foreseeable future. We may never generate revenues or, if we are able to generate revenues, achieve profitability.*

We were formed as a limited liability company in 2007 and since our inception have incurred a net loss in each of our previous operating years. Our ability to become profitable depends upon our ability to obtain marketing approval for and generate revenues from sales of our product candidates. We have been focused on product development and have not generated any revenues to date. We have incurred losses in each period of our operations, and we expect to continue to incur losses for the foreseeable future. These losses are likely to continue to adversely affect our working capital, total assets and shareholders’ equity (deficit). The process of developing our products requires significant clinical, development and laboratory testing and clinical trials. In addition, commercialization of our product candidates will require that we obtain necessary regulatory approvals and establish sales, marketing and manufacturing capabilities, either through internal hiring or through contractual relationships with others. We expect to incur substantial losses for the foreseeable future as a result of anticipated increases in our research and development costs, including costs associated with conducting preclinical testing and clinical trials, and regulatory compliance activities. We incurred net losses of \$12,536,638, \$10,384,953, and \$8,295,698 for the years ended September 30, 2018, 2017 and 2016, respectively. At September 30, 2018, we had stockholders’ equity of \$27,865,684 and an accumulated deficit of \$40,257,838. Our net cash used for operating activities was \$11,318,138, \$7,971,205, and \$5,900,421 for the years ended September 30, 2018, 2017 and 2016, respectively.

Our ability to generate revenues and achieve profitability will depend on numerous factors, including success in:

- developing and testing product candidates;
- receiving regulatory approvals for our product candidates;
- commercializing our product candidates;
- manufacturing commercial quantities of our product candidates at acceptable cost levels; and
- establishing a favorable competitive position for our product candidates.

Many of these factors will depend on circumstances beyond our control. We cannot assure you that any of our products will be approved by the FDA, that we will successfully bring any product to market or, if so, that we will ever become profitable.

***There is substantial doubt about our ability to continue as a going concern.***

Currently, we do not have sufficient capital to continue our operations after the first nine months of fiscal 2019. You should not rely on our consolidated balance sheet as an indication of the amount of proceeds that would be available to satisfy claims of creditors, and potentially be available for distribution to shareholders, in the event of liquidation.

Our audited consolidated financial statements included within have been prepared assuming that we will continue as a going concern and do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets, or the amounts and classification of liabilities that may result if we do not continue as a going concern. We have concluded that substantial doubt about our ability to continue as a going concern exists and our auditors have made reference to this in their audit report on our audited consolidated financial statements for the year ended September 30, 2018.

***We need to secure additional financing.***

We anticipate that we will incur operating losses for the foreseeable future. We have received gross proceeds of approximately \$35.6 million from our public and private placement offerings through September 30, 2018. Additionally, in connection with the acquisition of LMB our Executive Chairman, Leonard Mazur, made an equity investment of \$3.0 million in March 2016. Mr. Mazur has also loaned us \$4,710,000 pursuant to convertible promissory notes. On August 8, 2017, these notes and accrued interest of \$76,240 were converted into 1,547,067 shares of common stock at a price of \$3.09 per share as part of an underwritten public offering which closed on the same date.

The amount and timing of our future funding requirements will depend on many factors, including, but not limited to:

- the rate of progress and cost of our trials and other product development programs for our product candidates;
- the costs and timing of obtaining licenses for additional product candidates or acquiring other complementary technologies;
- the timing of any regulatory approvals of our product candidates;
- the costs of establishing sales, marketing and distribution capabilities; and
- the status, terms and timing of any collaborative, licensing, co-promotion or other arrangements.

We will need to access the capital markets in the future for additional capital for research and development and for operations. Traditionally, pharmaceutical companies have funded their research and development expenditures through raising capital in the equity markets. Declines and uncertainties in these markets over the past several years have severely restricted raising new capital and have affected companies' ability to continue to expand or fund existing research and development efforts. If these economic conditions continue or become worse, our future cost of equity or debt capital and access to the capital markets could be adversely affected. If we are not successful in securing additional financing, we may be required to delay significantly, reduce the scope of or eliminate one or more of our research or development programs, downsize our general and administrative infrastructure, or seek alternative measures to avoid insolvency, including arrangements with collaborative partners or others that may require us to relinquish rights to certain of our technologies or product candidates.

***We are a late-stage development company with an unproven business strategy and may never achieve commercialization of our therapeutic products or profitability.***

Our strategy of using collaborative partners to assist us in the development of our therapeutic products is unproven. Our success will depend upon our ability to enter into additional collaboration agreements on favorable terms and to select an appropriate commercialization strategy for each product candidate that we and our collaborators choose to pursue. If we are not successful in implementing our strategy to commercialize our product candidates, we may never achieve, maintain or increase profitability. Our ability to successfully commercialize any of our products or product candidates will depend, among other things, on our ability to:

- successfully complete clinical trials for our product candidates;
- produce, through a validated process, sufficiently large quantities of our drug compound(s) to permit successful commercialization of our product candidates;
- receive marketing approvals from the FDA and similar foreign regulatory authorities for our product candidates;
- establish commercial manufacturing arrangements with third-party manufacturers for our product candidates;
- build and maintain strong sales, distribution and marketing capabilities sufficient to launch commercial sales of any approved products or establish collaborations with third parties for such commercialization;
- secure acceptance of any approved products from physicians, health care payers, patients and the medical community; and
- manage our spending as costs and expenses increase due to clinical trials, regulatory applications and development and commercialization activities.

There are no guarantees that we will be successful in completing these tasks. If we are unable to successfully complete these tasks, we may not be able to commercialize any of our product candidates in a timely manner, or at all, in which case we may be unable to generate sufficient revenues to sustain and grow our business. If we experience unanticipated delays or problems, our development costs could substantially increase and our business, financial condition and results of operations will be adversely affected.

***We face significant risks in our product candidate development efforts.***

Our business depends on the successful development and commercialization of our product candidates. We are not permitted to market any of our product candidates in the United States until we receive approval of an NDA from the FDA, or in any foreign jurisdiction until we receive the requisite approvals from such jurisdiction. The process of developing new drugs and/or therapeutic products is inherently complex, unpredictable, time-consuming, expensive and uncertain. We must make long-term investments and commit significant resources before knowing whether our development programs will result in drugs that will receive regulatory approval and achieve market acceptance. Product candidates that appear to be promising at all stages of development may not reach the market for a number of reasons that may not be predictable based on results and data of the clinical program. Product candidates may be found ineffective or may cause harmful side effects during clinical trials, may take longer to progress through clinical trials than had been anticipated, may not be able to achieve the pre-defined clinical endpoints due to statistical anomalies even though clinical benefit may have been achieved, may fail to receive necessary regulatory approvals, may prove impracticable to manufacture in commercial quantities at reasonable cost and with acceptable quality, or may fail to achieve market acceptance.

We cannot predict whether or when we will obtain regulatory approval to commercialize our product candidates that are under development and we cannot, therefore, predict the timing of any future revenues from these product candidates, if any. The FDA has substantial discretion in the drug approval process, including the ability to delay, limit or deny approval of a product candidate for many reasons. For example, the FDA:

- could determine that we cannot rely on Section 505(b)(2) for Mino-Lok or Hydro-Lido or any future product candidates;
- could determine that the information provided by us was inadequate, contained clinical deficiencies or otherwise failed to demonstrate the safety and effectiveness of any of our product candidates for any indication;
- may not find the data from clinical trials sufficient to support the submission of an NDA or to obtain marketing approval in the United States, including any findings that the clinical and other benefits of our product candidates outweigh their safety risks;
- may disagree with our trial design or our interpretation of data from preclinical studies or clinical trials, or may change the requirements for approval even after it has reviewed and commented on the design for our trials;
- may determine that we have identified the wrong reference listed drug or drugs or that approval of our Section 505(b)(2) application for any of our product candidates is blocked by patent or non-patent exclusivity of the reference listed drug or drugs;
- may identify deficiencies in the manufacturing processes or facilities of third-party manufacturers with which we enter into agreements for the manufacturing of our product candidates;
- may approve our product candidates for fewer or more limited indications than we request, or may grant approval contingent on the performance of costly post-approval clinical trials;
- may change its approval policies or adopt new regulations that could adversely impact our product candidate development programs; or
- may not approve the labeling claims that we believe are necessary or desirable for the successful commercialization of our product candidates.

Any failure to obtain regulatory approval of our product candidates would significantly limit our ability to generate revenues, and any failure to obtain such approval for all of the indications and labeling claims we deem desirable could reduce our potential revenues.

***The results of pre-clinical studies and completed clinical trials are not necessarily predictive of future results, and our current product candidates may not have favorable results in later studies or trials.***

Pre-clinical studies and Phase 1 and Phase 2 clinical trials are not primarily designed to test the efficacy of a product candidate in the general population, but rather to test initial safety, to study pharmacokinetics and pharmacodynamics, to study limited efficacy in a small number of study patients in a selected disease population, and to identify and attempt to understand the product candidate's side effects at various doses and dosing schedules. Success in pre-clinical studies or completed clinical trials does not ensure that later studies or trials, including continuing pre-clinical studies and large-scale clinical trials, will be successful nor does it predict future results. Favorable results in early studies or trials may not be repeated in later studies or trials, and product candidates in later stage trials may fail to show acceptable safety and efficacy despite having progressed through earlier trials. In addition, the placebo rate in larger studies may be higher than expected.

We may be required to demonstrate through large, long-term outcome trials that our product candidates are safe and effective for use in a broad population prior to obtaining regulatory approval.

There is typically a high rate of attrition from the failure of product candidates proceeding through clinical trials. In addition, certain subjects in our clinical trials may respond positively to placebo treatment - these subjects are commonly known as “placebo responders” - making it more difficult to demonstrate efficacy of the test drug compared to placebo. This effect is likely to be observed in the treatment of hemorrhoids.

If any of our product candidates fail to demonstrate sufficient safety and efficacy in any clinical trial, we will experience potentially significant delays in, or may decide to abandon development of that product candidate. If we abandon or are delayed in our development efforts related to any of our product candidates, we may not be able to generate any revenues, continue our operations and clinical studies, or become profitable. Our reputation in the industry and in the investment community would likely be significantly damaged. Further, it might not be possible for us to raise funds in the public or private markets, and our stock price would likely decrease significantly.

***If we are unable to file for approval of Mino-Lok or Hydro-Lido under Section 505(b)(2) of the Federal Food, Drug and Cosmetic Act or if we are required to generate additional data related to safety and efficacy in order to obtain approval of Mino-Lok under Section 505(b)(2), we may be unable to meet our anticipated development and commercialization timelines.***

Our current plans for filing additional NDAs for our product candidates include efforts to minimize the data we will be required to generate in order to obtain marketing approval for our additional product candidates and therefore possibly reduce the time and cost of development of a product candidate and obtain a shortened review period for the application. The timeline for filing and review of our planned NDA for each of Mino-Lok and Hydro-Lido is based upon our plan to submit each such NDA under Section 505(b)(2) of the Federal Food, Drug and Cosmetic Act, wherein we will rely in part on data in the public domain or elsewhere. Depending on the data that may be required by the FDA for approval, some of the data may be related to products already approved by the FDA. If the data relied upon is related to products already approved by the FDA and covered by third-party patents we would be required to certify that we do not infringe the listed patents or that such patents are invalid or unenforceable. As a result of the certification, the third party would have 45 days from notification of our certification to initiate an action against us. In the event that an action is brought in response to such a certification, the approval of our NDA could be subject to a stay of up to 30 months or more while we defend against such a suit. Approval of any product candidate under Section 505(b)(2) may therefore be delayed until patent exclusivity expires or until we successfully challenge the applicability of those patents applicable to our product candidates. Alternatively, we may elect to generate sufficient additional clinical data so that we no longer rely on data which triggers a potential stay of the approval of any product candidate. Even if no exclusivity periods apply to an application under Section 505(b)(2), the FDA has broad discretion to require us to generate additional data on the safety and efficacy of our product candidates to supplement third-party data on which we may be permitted to rely. In either event, we could be required, before obtaining marketing approval for such product candidate, to conduct substantial new research and development activities beyond those we currently plan to engage in order to obtain approval of that product candidate. Such additional new research and development activities would be costly and time consuming.

We may not be able to obtain shortened review of our applications where available, and in any event the FDA may not agree that any of our product candidates qualify for marketing approval. If we are required to generate additional data to support approval, we may be unable to meet our anticipated development and commercialization timelines, may be unable to generate the additional data at a reasonable cost, or at all, and may be unable to obtain marketing approval of that product candidate. In addition, notwithstanding the approval of many products by the FDA pursuant to Section 505(b)(2), over the last few years, some pharmaceutical companies and others have objected to the FDA’s interpretation of Section 505(b)(2). If the FDA changes its interpretation of Section 505(b)(2), or if the FDA’s interpretation is successfully challenged in court, this could delay or even prevent the FDA from approving any Section 505(b)(2) application that we submit.

***Even if we receive regulatory approval to commercialize our product candidates, post-approval marketing and promotion of products is highly regulated by the FDA, and marketing campaigns which violate FDA standards may result in adverse consequences including regulatory enforcement action by the FDA as well as follow-on actions filed by consumers and other end-payers, which could result in substantial fines, sanctions and damage awards against us, any of which could harm our business.***

Post-approval marketing and promotion of drugs, standards and regulations for direct-to-consumer advertising, dissemination of off-label product information, industry-sponsored scientific and educational activities and promotional activities via the Internet are heavily scrutinized and regulated by the FDA. Drugs may only be marketed for approved indications and in accordance with provisions of the FDA approved labels. Failure to comply with such requirements may result in adverse publicity, warning letters issued by the FDA, and civil or criminal penalties.

In the event the FDA discovers post-approval violations, we could face penalties in the future including the FDA's issuance of a cease and desist order, impounding of our products, and civil or criminal penalties. As a follow-on to such governmental enforcement activities, consumers and other end-payers of the product may initiate action against us claiming, among other things, fraudulent misrepresentation, unfair competition, violation of various state consumer protection statutes and unjust enrichment. If the plaintiffs in such follow-on actions are successful, we could be subject to various damages, including compensatory damages, treble damages, punitive damages, restitution, disgorgement, prejudgment and post-judgment interest on any monetary award, and the reimbursement of the plaintiff's legal fees and costs, any of which could have an adverse effect on our revenue, business, financial condition and prospects.

***Even if we receive regulatory approval to commercialize a product candidate, our ability to generate revenues from any resulting product will be subject to a variety of risks, many of which are out of our control.***

Even if one of our product candidates obtain regulatory approval, the product may not gain market acceptance among physicians, patients, healthcare payers or the medical community. The indication may be limited to a subset of the population or we may implement a distribution system and patient access program that is limited. Coverage and reimbursement of our product candidates by third-party payers, including government payers, generally is also necessary for optimal commercial success. We believe that the degree of market acceptance and our ability to generate revenues from any approved produce candidate or acquired product will depend on a number of factors, including:

- prevalence and severity of any side effects;
- results of any post-approval studies of the drug;
- potential or perceived advantages or disadvantages over alternative treatments including generics;
- the relative convenience and ease of administration and dosing schedule;
- availability of coverage and reimbursement from government and other third-party payers;
- the willingness of patients to pay out of pocket in the absence of government or third-party coverage;
- product labeling or product insert requirements of the FDA or other regulatory authorities;
- strength of sales, marketing and distribution support;
- price of any future drugs, if approved, both in absolute terms and relative to alternative treatments;
- the effectiveness of our or any future collaborators' sales and marketing strategies;
- the effect of current and future healthcare laws on our product candidates;
- patient access programs that require patients to provide certain information prior to receiving new and refill prescriptions; and
- requirements for prescribing physicians to complete certain educational programs for prescribing drugs.

If approved, any product candidate may fail to achieve market acceptance or generate significant revenue to achieve or sustain profitability. In addition, our efforts to educate the medical community and third-party payers on the benefits of any product candidate may require significant resources and may never be successful.

***Even if approved for marketing by applicable regulatory bodies, we will not be able to create a market for any of our products if we fail to establish marketing, sales and distribution capabilities, or fail to enter into arrangements with third parties.***

Our strategy with our product candidates is to outsource to third parties, all or most aspects of the product development process, as well as marketing, sales and distribution activities. Currently, we do not have any sales, marketing or distribution capabilities. In order to generate sales of any product candidates that receive regulatory approval, we must either acquire or develop an internal marketing and sales force with technical expertise and with supporting distribution capabilities or make arrangements with third parties to perform these services for us. The acquisition or development of a sales and distribution infrastructure would require substantial resources, which may divert the attention of our management and key personnel and defer our product development efforts. To the extent that we enter into marketing and sales arrangements with other companies, our revenues will depend on the efforts of others. These efforts may not be successful. If we fail to develop sales, marketing and distribution channels, or enter into arrangements with third parties, we will experience delays in product sales and incur increased costs.

***The markets in which we operate are highly competitive and we may be unable to compete successfully against new entrants or established companies.***

Competition in the pharmaceutical and medical products industries is intense and is characterized by costly and extensive research efforts and rapid technological progress. We are aware of several pharmaceutical companies also actively engaged in the development of therapies for at least some of the same conditions we are targeting. Many of these companies have substantially greater research and development capabilities as well as substantially greater marketing, financial and human resources than we do. In addition, many of these companies have significantly greater experience than us in undertaking pre-clinical testing, human clinical trials and other regulatory approval procedures. Our competitors may develop technologies and products that are more effective than those we are currently marketing or researching and developing. Such developments could render our product candidates, if approved, less competitive or possibly obsolete. We are also competing with respect to marketing capabilities and manufacturing efficiency, areas in which we have no current capabilities and in which we have limited experience. Mergers, acquisitions, joint ventures and similar events may also significantly increase the competition we face. In addition, new developments, including the development of other drug technologies and methods of preventing the incidence of disease, occur in the pharmaceutical and medical technology industries at a rapid pace. These developments may render our products and product candidates obsolete or noncompetitive. Compared to us, many of our potential competitors have substantially greater:

- research and development resources, including personnel and technology;
- regulatory resources, experience and expertise;
- product candidate development and clinical trial resources and experience;
- product sourcing, sales and marketing resources and experience;
- experience and expertise in exploitation of intellectual property rights; and
- access to strategic partners and capital resources.

As a result of these factors, our competitors may obtain regulatory approval of their products more rapidly than we can or may obtain patent protection or other intellectual property rights that limit our ability to develop or commercialize our product candidates. Our competitors may also develop drugs or surgical approaches that are more effective, more useful and less costly than ours and may also be more successful in manufacturing and marketing their products. In addition, our competitors may be more effective than us in commercializing their products and as a result, our business and prospects might be materially harmed.

***Physicians and patients might not accept and use any of our products for which regulatory approval is obtained.***

Even if the FDA approves one of our product candidates, physicians and patients might not accept and use it. Acceptance and use of our approved products will depend upon a number of factors, including:

- perceptions by members of the health care community, including physicians, about the safety and effectiveness of our products;
- cost-effectiveness of our product relative to competing products or therapies;
- availability of reimbursement for our product from government or other healthcare payers; and
- effective marketing and distribution efforts by us and/or our licensees and distributors, if any.

If our current product candidates are approved, we expect their sales to generate substantially all of our revenues for the foreseeable future, and as a result, the failure of these products to find market acceptance would harm our business and would require us to seek additional financing.

***Our two product candidates, Mino-Lok and Hydro-Lido, are combination products consisting of components that have each been separately approved by the FDA for other indications and which are commercially available and marketed by other companies. Our approval under 505(b)(2), if received, would not preclude physicians, pharmacists and patients from obtaining individual drug products and titrating the dosage of these drug products as close to our approved dose as possible.***

Our Hydro-Lido product candidate for the treatment of hemorrhoids is a combination product consisting of two drugs, hydrocortisone and lidocaine, that have each been separately approved by the FDA for other indications and which are commercially available and marketed by other companies. Hydrocortisone creams are available from strengths ranging from 0.5% to 2.5% and lidocaine creams are also available in strengths up to 5%. From our market analysis and discussions with a limited number of physicians, we know that patients sometimes obtain two separate cream products and co-administer them as prescribed, giving them a combination treatment which could be very similar to what we intend to study and seek approval for. As a branded, FDA-approved product with safety and efficacy data, we intend to price our product substantially higher than the generically available individual creams. We will then have to convince third-party payers and pharmacy benefit managers of the advantages of our product and justify our premium pricing. We may encounter resistance from these entities and will then be dependent on patients' willingness to pay the premium and not seek alternatives. In addition, pharmacists often suggest lower cost prescription treatment alternatives to both physicians and patients. Our 505(b)(2) approval and the market exclusivity we may receive will not guarantee that such alternatives will not exist, that substitution will not occur, or that there will be immediate acceptance to our pricing by payer formularies.

Our Mino-Lok solution contains minocycline, disodium ethylenediaminetetraacetic acid (edetate), and ethyl alcohol, all of which have been separately approved by the FDA for other indications, or are used as excipients in other parenteral products.

***Our ability to generate product revenues will be diminished if any of our approved products sell for inadequate prices or patients are unable to obtain adequate levels of reimbursement.***

Our ability to commercialize our product candidates, alone or with collaborators, will depend in part on the extent to which reimbursement will be available from:

- government and health administration authorities;
- private health maintenance organizations and health insurers; and
- other healthcare payers.

Significant uncertainty exists as to the reimbursement status of newly approved healthcare products. Healthcare payers, including Medicare, are challenging the prices charged for medical products and services. Government and other healthcare payers increasingly attempt to contain healthcare costs by limiting both coverage and the level of reimbursement for drugs. Even if our product candidates are approved by the FDA, insurance coverage might not be available, and reimbursement levels might be inadequate, to cover our products. If government and other healthcare payers do not provide adequate coverage and reimbursement levels for our products, once approved, market acceptance of such products could be reduced. Proposals to modify the current health care system in the U.S. to improve access to health care and control its costs are continually being considered by the federal and state governments. In March 2010, the U.S. Congress passed landmark healthcare legislation. Portions of this legislation have been repealed recently and members of the U.S. Congress and some state legislatures continue to seek to overturn at least some remaining portions of the legislation and we expect they will continue to review and assess this legislation and possibly alternative health care reform proposals. We cannot predict what impact on federal reimbursement policies this legislation will have in general or on our business specifically. We cannot predict whether new proposals will be made or adopted, when they may be adopted or what impact they may have on us if they are adopted.

Health administration authorities in countries other than the U.S. may not provide reimbursement for our products at rates sufficient for us to achieve profitability, or at all. Like the U.S., these countries have considered health care reform proposals and could materially alter their government-sponsored health care programs by reducing reimbursement rates. Any reduction in reimbursement rates under Medicare or foreign health care programs could negatively affect the pricing of our products. If we are not able to charge a sufficient amount for our products, then our margins and our profitability will be adversely affected.

***We rely exclusively on third parties to formulate and manufacture our product candidates.***

We do not have and do not intend to establish our own manufacturing facilities. Consequently, we lack the physical plant to formulate and manufacture our own product candidates, which are currently being manufactured entirely by a commercial third party. If any additional product candidate we might develop or acquire in the future receives FDA approval, we will rely on one or more third-party contractors to manufacture our products. If, for any reason, we become unable to rely on our current source or any future source to manufacture our product candidates, either for clinical trials or, for commercial quantities, then we would need to identify and contract with additional or replacement third-party manufacturers to manufacture compounds for preclinical, clinical and commercial purposes. We might not be successful in identifying additional or replacement third-party manufacturers, or in negotiating acceptable terms with any that we do identify. If we are unable to secure and maintain third-party manufacturing capacity, the development and sales of our products and our financial performance might be materially affected.

In addition, before any of our collaborators can begin to commercially manufacture our product candidates, each must obtain regulatory approval of the manufacturing facility and process. Manufacturing of drugs for clinical and commercial purposes must comply with the FDA's Current Good Manufacturing Practices, or cGMP, and applicable non-U.S. regulatory requirements. The cGMP requirements govern quality control and documentation policies and procedures. Complying with cGMP and non-U.S. regulatory requirements will require that we expend time, money, and effort in production, recordkeeping, and quality control to assure that the product meets applicable specifications and other requirements. Our contracted manufacturing facilities must also pass a pre-approval inspection prior to FDA approval. Failure to pass a pre-approval inspection might significantly delay FDA approval of our products. If any of our collaborators fails to comply with these requirements, we would be subject to possible regulatory action which could limit the jurisdictions in which we are permitted to sell our products. As a result, our business, financial condition, and results of operations might be materially harmed.

Our reliance on a limited number of third-party manufacturers exposes us to the following risks:

- We might be unable to identify manufacturers for commercial supply on acceptable terms or at all because the number of potential manufacturers is limited and the FDA must approve any replacement contractor. This approval would generally require compliance inspections. In addition, a new manufacturer would have to be educated in, or develop substantially equivalent processes for, production of our products after receipt of FDA approval, if any;
- Our third-party manufacturers might be unable to formulate and manufacture our products in the volume and of the quality required to meet our clinical and commercial needs, if any;
- Our contract manufacturers might not perform as agreed or might not remain in the contract manufacturing business for the time required to supply our clinical trials or to successfully produce, store and distribute our products;
- Currently, our contract manufacturer for our clinical supplies is foreign, which increases the risk of shipping delays and adds the risk of import restrictions;
- Drug manufacturers are subject to ongoing periodic unannounced inspection by the FDA and corresponding state agencies to ensure strict compliance with cGMP and other government regulations and corresponding foreign standards. We do not have complete control over third-party manufacturers' compliance with these regulations and standards;
- If any third-party manufacturer makes improvements in the manufacturing process for our products, we might not own, or might have to share, the intellectual property rights to the innovation with our licensors;
- Operations of our third-party manufacturers or suppliers could be disrupted by conditions unrelated to our business or operations, including a bankruptcy of the manufacturer or supplier; and
- We might compete with other companies for access to these manufacturers' facilities and might be subject to manufacturing delays if the manufacturers give other clients higher priority than us.

Each of these risks could delay our clinical trials or the approval, if any, of our product candidates by the FDA or any foreign regulatory agency or the commercialization of our product candidates and could result in higher costs or deprive us of potential product revenues. As a result, our business, financial condition, and results of operations might be materially harmed.

***We are and will be dependent on third-party contract research organizations to conduct all of our future human trials.***

We are and will be dependent on third-party research organizations to conduct all of our human trials with respect to our product candidates, including those that we may develop in the future. If we are unable to obtain any necessary testing services on acceptable terms, we may not complete our product development efforts in a timely manner. If we rely on third parties for human trials, we may lose some control over these activities and become too dependent upon these parties. These third parties may not complete testing activities on schedule or when we so request. We may not be able to secure and maintain suitable research organizations to conduct our human trials. We are responsible for confirming that each of our clinical trials is conducted in accordance with our general plan and protocol. Moreover, the FDA and foreign regulatory agencies require us to comply with regulations and standards, commonly referred to as good clinical practices, for conducting, recording and reporting the results of clinical trials to assure that data and reported results are credible and accurate and that the trial participants are adequately protected. Our reliance on third parties does not relieve us of these responsibilities and requirements. If these third parties do not successfully carry out their contractual duties or regulatory obligations or meet expected deadlines, if the third parties need to be replaced or if the quality or accuracy of the data they obtain is compromised due to the failure to adhere to our clinical protocols or regulatory requirements or for other reasons, our preclinical development activities or clinical trials may be extended, delayed, suspended or terminated, and we may not be able to obtain regulatory approval for our future product candidates.

***Any termination or breach by or conflict with our strategic partners or licensees could harm our business.***

If we or any of our collaborators or licensees fail to renew or terminate any of our collaboration or license agreements or if either party fails to satisfy its obligations under any of our collaboration or license agreements or complete them in a timely manner, we could lose significant sources of revenue, which could result in volatility in our future revenue. In addition, our agreements with our collaborators and licensees may have provisions that give rise to disputes regarding the rights and obligations of the parties. These and other possible disagreements could lead to termination of the agreement or delays in collaborative research, development, supply or commercialization of certain products, or could require or result in litigation or arbitration. Any such conflicts with our collaborators could reduce our ability to obtain future collaboration agreements and could have a negative impact on our relationship with existing collaborators, adversely affecting our business and revenues. Finally, any of our collaborations or license agreements may prove to be unsuccessful.

***We might seek to grow and develop our business through acquisitions of or investment in new or complementary businesses, products or technologies, and the failure to manage these acquisitions or investments, or the failure to integrate them with our existing business, could have a material adverse effect on us.***

We might consider opportunities to acquire or invest in other technologies, products and businesses that might enhance our capabilities or complement our current product candidates. Potential and completed acquisitions and strategic investments involve numerous risks, including potential problems or issues associated with the following:

- assimilating the purchased technologies, products or business operations;
- maintaining uniform standards, procedures, controls and policies;
- unanticipated costs associated with the acquisition or investment;
- diversion of our management's attention from our preexisting business;
- maintaining or obtaining the necessary regulatory approvals or complying with regulatory standards; and
- adverse effects on existing business operations.

We have no current commitments with respect to any acquisition or investment in other technologies or businesses. We do not know if we will identify suitable acquisitions, whether we will be able to successfully complete any acquisitions, or whether we will be able to successfully integrate any acquired product, technology or business into our business or retain key personnel, suppliers or collaborators.

Our ability to successfully develop our business through acquisitions would depend on our ability to identify, negotiate, complete and integrate suitable target businesses or technologies and obtain any necessary financing. These efforts could be expensive and time consuming and might disrupt our ongoing operations. If we are unable to efficiently integrate any acquired business, technology or product into our business, our business and financial condition might be adversely affected.

***If we are unable to retain or hire additional qualified personnel, our ability to grow our business might be harmed.***

We utilize the services of a clinical management team on part-time basis to assist us in managing our ongoing Phase 2 and Phase 3 trials and intend to do so for future trials. While we believe this will provide us with sufficient staffing for our current and future development efforts, we will need to hire or contract with additional qualified personnel with expertise in preclinical testing, clinical research and testing, government regulation, formulation and manufacturing and sales and marketing in connection with the continued development, regulatory approval and commercialization of our product candidates. We compete for qualified individuals with numerous pharmaceutical and biopharmaceutical companies, universities and other research institutions. Competition for these individuals is intense, and we cannot be certain that our search for such personnel will be successful. Attracting and retaining qualified personnel will be critical to our success. In addition, we may be unable to attract and retain those qualified officers, directors and members of board committees required to provide for effective management. If we are unable to attract and retain qualified employees, officers and directors, the management and operation of our business could be adversely affected.

***We expect to need to increase the size of our organization to further develop our product candidates, and we may experience difficulties in managing growth.***

We will need to manage our anticipated growth and increased operational activity. Our personnel, systems and facilities currently in place may not be adequate to support this future growth. Our need to effectively execute our growth strategy will require that we:

- manage our regulatory trials effectively;
- attract and motivate sufficient numbers of talented employees;
- manage our internal development efforts effectively while complying with our contractual obligations to licensors, licensees, contractors, collaborators and other third parties;
- develop internal sales and marketing capabilities or establish collaborations with third parties with such capabilities;
- commercialize our product candidates; and
- improve our operational, financial and management controls, reporting systems and procedures.

This planned future growth could place a strain on our administrative and operational infrastructure and may require our management to divert a disproportionate amount of its attention away from our day-to-day activities. We may not be able to effectively manage the expansion of our operations or recruit and train additional qualified personnel, which may result in weaknesses in our infrastructure, and give rise to operational mistakes, loss of business opportunities, loss of employees and reduced productivity among remaining employees. We may not be able to make improvements to our management information and control systems in an efficient or timely manner and may discover deficiencies in existing systems and controls. If our management is unable to effectively manage our expected growth, our expenses may increase more than expected, our ability to generate or increase our revenues could be reduced and we may not be able to implement our business strategy. Our future financial performance and our ability to compete effectively will depend, in part, on our ability to effectively manage any future growth.

#### **Risks Related to Our Regulatory and Legal Environment**

***We are subject to extensive and costly government regulation.***

Product candidates and approved products such as ours are subject to extensive and rigorous domestic government regulation including regulation by the FDA, the Centers for Medicare and Medicaid Services, other divisions of the U.S. Department of Health and Human Services, the U.S. Department of Justice, state and local governments, and their respective foreign equivalents. The FDA regulates the research, development, preclinical and clinical testing, manufacture, safety, effectiveness, record keeping, reporting, labeling, storage, approval, advertising, promotion, sale, distribution, import, and export of pharmaceutical products. The FDA regulates small molecule chemical entities, whether administered orally, topically or by injection, as drugs, subject to an NDA, under the Federal Food, Drug, and Cosmetic Act. If our product candidates are to be marketed abroad, they will also be subject to extensive regulation by foreign governments, whether or not they have obtained FDA approval. Such foreign regulation might be equally or more demanding than corresponding U.S. regulation. Government regulation substantially increases the cost and risk of researching, developing, manufacturing, and selling our products. The regulatory review and approval process, which includes preclinical testing and clinical trials of each product candidate, is lengthy, expensive, and uncertain. Our collaborators or we must obtain and maintain regulatory authorization to conduct clinical trials and approval for each product we intend to market, and the manufacturing facilities used for the products must be inspected and meet legal requirements. Securing regulatory approval requires submitting extensive preclinical and clinical data and other supporting information for each proposed therapeutic indication in order to establish the product's safety and efficacy for each intended use. The development and approval process might take many years, requires substantial resources, and might never lead to the approval of a product. Even if we are able to obtain regulatory approval for a particular product, the approval might limit the indicated medical uses for the product, limit our ability to promote, sell, and distribute the product, require that we conduct costly post-marketing surveillance, and/or require that we conduct ongoing post-marketing studies. Material changes to an approved product, such as, for example, manufacturing changes or revised labeling, might require further regulatory review and approval. Once obtained, any approvals might be withdrawn, including, for example, if there is a later discovery of previously unknown problems with the product, such as a previously unknown safety issue.

If we, our collaborators, or our contract manufacturers fail to comply with applicable regulatory requirements at any stage during the regulatory process, such noncompliance could result in, among other things, delays in the approval of applications or supplements to approved applications; refusal of a regulatory authority, including the FDA, to review pending market approval applications or supplements to approved applications; warning letters; fines; import and export restrictions; product recalls or seizures; injunctions; total or partial suspension of production; civil penalties; withdrawals of previously approved marketing applications or licenses; recommendations by the FDA or other regulatory authorities against governmental contracts; and/or criminal prosecutions.

***We might not obtain the necessary U.S. regulatory approvals to commercialize any product candidates.***

We cannot assure you that we will receive the approvals necessary to commercialize for sale any product candidates we are currently developing or that we may acquire or develop in the future. We will need FDA approval to commercialize our product candidates in the U.S. In order to obtain FDA approval of any product candidate, we must submit to the FDA an NDA demonstrating that the product candidate is safe for humans and effective for its intended use. This demonstration requires significant research, pre-clinical studies, and clinical trials. Satisfaction of the FDA's regulatory requirements typically takes many years, depends upon the type, complexity and novelty of the product candidate and requires substantial resources for research, development and testing. We cannot predict whether our research and clinical approaches will result in additional drugs that the FDA considers safe for humans and effective for their indicated uses. The FDA has substantial discretion in the product approval process and might require us to conduct additional pre-clinical and clinical testing, perform post-marketing studies or otherwise limit or impose conditions on any additional approvals we obtain. The approval process might also be delayed by changes in government regulation, future legislation or administrative action or changes in FDA policy that occur prior to or during our regulatory review. Delays in obtaining regulatory approvals might:

- delay commercialization of, and our ability to derive product revenues from, our product candidates;
- impose costly procedures on us; and
- diminish any competitive advantages that we might otherwise enjoy.

Even if we comply with all FDA requests, the FDA might ultimately reject one or more of our NDAs. We cannot be sure that we will ever obtain regulatory clearance for our product candidates. Failure to obtain FDA approval of our product candidates will severely undermine our business by leaving us without saleable products, and therefore without any potential sources of revenues, until another product candidate could be developed or obtained. There is no guarantee that we will ever be able to develop or acquire any product candidate.

***Following any regulatory approval of any product candidates, we will be subject to ongoing regulatory obligations and restrictions, which may result in significant expense and limit our ability to commercialize our potential drugs.***

If one of our product candidates is approved by the FDA or by a foreign regulatory authority, we will be required to comply with extensive regulations for product manufacturing, labeling, packaging, adverse event reporting, storage, distribution, advertising, promotion and record keeping. Regulatory approvals may also be subject to significant limitations on the indicated uses or marketing of the products or to whom and how we may distribute our products. Even if U.S. regulatory approval is obtained, the FDA may still impose significant restrictions on a drug's indicated uses or marketing or impose ongoing requirements for potentially costly post-approval studies. For example, the label ultimately approved for our products, if any, may include restrictions on use, including restrictions based on level of obesity and duration of treatment. If so, we may be subject to ongoing regulatory obligations and restrictions, which may result in significant expense and limit our ability to commercialize our products. The FDA could also require a registry to track the patients utilizing the drug or implement a Risk Evaluation and Mitigation Strategy, or REMS, that could restrict access to the drug, reduce our revenues and/or increase our costs. Potentially costly post-marketing clinical studies may be required as a condition of approval to further substantiate safety or efficacy, or to investigate specific issues of interest to the regulatory authority.

Manufacturers of pharmaceutical products and their facilities are subject to continual review and periodic inspections by the FDA and other regulatory authorities for compliance with current good manufacturing practices, or cGMP, regulations, which include requirements relating to quality control and quality assurance as well as the corresponding maintenance of records and documentation. Further, regulatory agencies must approve these manufacturing facilities before they can be used to manufacture our future approved products, if any, and these facilities are subject to ongoing regulatory inspections. In addition, regulatory agencies subject a pharmaceutical product, its manufacturer and the manufacturer's facilities to continual review and inspections. The subsequent discovery of previously unknown problems with a product, including adverse events of unanticipated severity or frequency, or problems with the facility where the product is manufactured, may result in restrictions on the marketing of that product, up to and including, withdrawal of the product from the market. If the manufacturing facilities of our suppliers fail to comply with applicable regulatory requirements, it could result in regulatory action and additional costs to us. Failure to comply with applicable FDA and other regulatory requirements may, either before or after product approval, if any, subject our company to administrative or judicially imposed sanctions, including:

- issuance of Form 483 notices, warning letters and adverse publicity by the FDA or other regulatory agencies;
- imposition of fines and other civil penalties due to product liability or other issues;
- injunctions, suspensions or revocations of regulatory approvals;
- suspension of any ongoing clinical trials;
- total or partial suspension of manufacturing;
- delays in commercialization;
- refusal by the FDA to approve pending applications or supplements to approved applications filed by us or our collaborators;
- refusals to permit medical products to be imported into or exported from the U.S.;
- restrictions on operations, including costly new manufacturing requirements;
- product recalls or seizures; and
- criminal prosecutions.

In addition, the law or regulatory policies governing pharmaceutical products may change. New statutory requirements may be enacted or additional regulations may be enacted that could prevent or delay regulatory approval of our product candidates. Contract manufacturing organizations, or CMOs, and their vendors or suppliers may also face changes in regulatory requirements from governmental agencies in the U.S. and other countries. We cannot predict the likelihood, nature, extent or effects of government regulation that may arise from future legislation or administrative action, either in the U.S. or elsewhere. If we are not able to maintain regulatory compliance, we might not be permitted to market any future approved products and our business could suffer.

***We could be forced to pay substantial damage awards if product liability claims that may be brought against us are successful.***

The use of any of our product candidates in clinical trials, and the sale of any approved products, may expose us to liability claims and financial losses resulting from the use or sale of our products. We have obtained limited product liability insurance coverage for our clinical trials of \$2.0 million per occurrence and in the aggregate, subject to a deductible of \$50,000 per occurrence. There can be no assurance that our existing insurance coverage will extend to any other products in the future. Any product liability insurance coverage may not be sufficient to satisfy all liabilities resulting from product liability claims. A successful claim may prevent us from obtaining adequate product liability insurance in the future on commercially desirable terms, if at all. Even if a claim is not successful, defending such a claim would be time consuming and expensive, may damage that product's and our reputations in the marketplace, and would likely divert management's attention, any of which could have a material adverse effect on our company.

**Risks Related to our Intellectual Property**

***Our business depends on protecting our intellectual property.***

If we do not obtain protection for our intellectual property rights, our competitors might be able to take advantage of our research and development efforts to develop competing products. Our success, competitive position and future revenues, if any, depend in part on our ability and the abilities of our licensors to obtain and maintain patent protection for our products, methods, processes and other technologies, to preserve our trade secrets, to prevent third parties from infringing on our proprietary rights and to operate without infringing the proprietary rights of third parties. We anticipate filing additional patent applications both in the U.S. and in other countries, as appropriate. However, the patent process is subject to numerous risks and uncertainties, and there can be no assurance that we will be successful in protecting our products by obtaining and defending patents. These risks and uncertainties include the following:

- Our patent rights might be challenged, invalidated, or circumvented, or otherwise might not provide any competitive advantage;
- Our competitors, many of which have substantially greater resources than we do and many of which might make significant investments in competing technologies, might seek, or might already have obtained, patents that will limit, interfere with, or eliminate our ability to make, use, and sell our potential products either in the U.S. or in international markets;
- Countries other than the U.S. might have less restrictive patent laws than those upheld by U.S. courts, allowing foreign competitors the ability to exploit these laws to create, develop, and market competing products; and
- As a matter of public policy regarding worldwide health concerns, there might be significant pressure on the U.S. government and other international governmental bodies to limit the scope of patent protection both inside and outside the U.S. for disease treatments that prove successful.

In addition, the U.S. Patent and Trademark Office and patent offices in other jurisdictions have often required that patent applications concerning pharmaceutical and/or biotechnology-related inventions be limited or narrowed substantially to cover only the specific innovations exemplified in the patent application, thereby limiting the scope of protection against competitive challenges. Thus, even if we or our licensors are able to obtain patents, the patents might be substantially narrower than anticipated.

Because the time period from filing a patent application to the issuance, if ever, of the patent is often more than three years and because any regulatory approval and marketing for a pharmaceutical product often occurs several years after the related patent application is filed, the resulting market exclusivity afforded by any patent on our drug candidates and technologies will likely be substantially less than 20 years. In the United States, the European Union and some other jurisdictions, patent term extensions are available for certain delays in either patent office proceedings or marketing and regulatory approval processes. However, due to the specific requirements for obtaining these extensions, there is no assurance that our patents will be granted extensions even if we encounter significant delays in patent office proceedings or marketing and regulatory approval.

Patent and other intellectual property protection is crucial to the success of our business and prospects, and there is a substantial risk that such protections will prove inadequate. Our business and prospects will be harmed if these protections prove insufficient.

***We rely on trade secret protections through confidentiality agreements with our employees, customers and other parties, and the breach of these agreements could adversely affect our business and prospects.***

We rely on trade secrets, which we seek to protect, in part, through confidentiality and non-disclosure agreements with our employees, collaborators, suppliers, and other parties. There can be no assurance that these agreements will not be breached, that we would have adequate remedies for any such breach or that our trade secrets will not otherwise become known to or independently developed by our competitors. We might be involved from time to time in litigation to determine the enforceability, scope and validity of our proprietary rights. Any such litigation could result in substantial cost and divert management's attention from our operations.

***If we infringe the rights of third parties we might have to forego developing and/or selling any approved products, pay damages, or defend against litigation.***

If our product candidates, methods, processes and other technologies infringe the proprietary rights of other parties, we could incur substantial costs and we might have to:

- obtain licenses, which might not be available on commercially reasonable terms, if at all;
- abandon an infringing product candidate;
- redesign our products or processes to avoid infringement;
- stop using the subject matter claimed in the patents held by others;
- pay damages; and/or
- defend litigation or administrative proceedings which might be costly whether we win or lose, and which could result in a substantial diversion of our financial and management resources.

Any of these events could substantially harm our earnings, financial condition and operations.

#### **Risks Related to Our Securities**

***Our failure to meet the continued listing requirements of Nasdaq could result in a delisting of our common stock and warrants.***

Our common stock and warrants are currently listed on the Nasdaq Capital Market. If we fail to satisfy the continued listing requirements of Nasdaq, such as the corporate governance requirements or the minimum closing bid price requirement, Nasdaq may take steps to delist our common stock and warrants. Such a delisting would likely have a negative effect on the price of our common stock and warrants and would impair your ability to sell or purchase our common stock and warrants when you wish to do so. In addition, we could face significant material adverse consequences, including:

- a limited availability of market quotations for our securities;
- a limited amount of news and analyst coverage for us; and
- a decreased ability to issue additional securities or obtain additional financing in the future.

In the event of a delisting, we would take actions to restore our compliance with Nasdaq's listing requirements, but we can provide no assurance that any such action taken by us would allow our common stock to become listed again, stabilize the market price or improve the liquidity of our common stock, prevent our common stock from dropping below the Nasdaq minimum bid price requirement or prevent future non-compliance with Nasdaq's listing requirements.

***If our common stock were delisted and determined to be a "penny stock," a broker-dealer may find it more difficult to trade our common stock and an investor may find it more difficult to acquire or dispose of our common stock in the secondary market.***

If our common stock were removed from listing with Nasdaq, it may be subject to the so-called "penny stock" rules. The SEC has adopted regulations that define a "penny stock" to be any equity security that has a market price per share of less than \$5.00, subject to certain exceptions, such as any securities listed on a national securities exchange. For any transaction involving a "penny stock," unless exempt, the rules impose additional sales practice requirements on broker-dealers, subject to certain exceptions. If our common stock were delisted and determined to be a "penny stock," a broker-dealer may find it more difficult to trade our common stock and an investor may find it more difficult to acquire or dispose of our common stock on the secondary market.

***If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or detect fraud. Consequently, shareholders could lose confidence in our financial reporting and this may decrease the trading price of our common stock.***

We are subject to the reporting requirements of the Exchange Act, Sarbanes-Oxley Act of 2002, or SOX, and Nasdaq rules and regulations. SOX requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. We perform system and process evaluation and testing of our internal control over financial reporting to allow management to report on the effectiveness of our internal controls over financial reporting in our Annual Report on Form 10-K filing for that year, as required by Section 404 of SOX. We previously had identified material weaknesses in our internal control over financial reporting related to ineffective separation of duties due to our limited finance staff, our reliance on consultants to assist with the financial reporting function and a lack of documented policies and procedures, which weaknesses were reported in fiscal 2016 and 2017. While we remediated these material weaknesses as of September 30, 2018, such that management has determined that our internal controls over financial reporting were effective as of that date, we cannot assure that, in the future, a material weakness or significant deficiency will not exist or otherwise be discovered. If that were to happen, it could harm our operating results and cause shareholders to lose confidence in our reported financial information. Any such loss of confidence would have a negative effect on the trading price of our securities.

***The price of our securities may become volatile, which could lead to losses by shareholders and costly securities litigation.***

The trading price of our securities is likely to be highly volatile and could fluctuate in response to factors such as:

- actual or anticipated variations in our operating results;
- announcements of developments by us or our competitors;
- the completion and/or results of our clinical trials;
- regulatory actions regarding our product candidates or any approved products;
- announcements by us or our competitors of significant acquisitions, strategic partnerships, joint ventures or capital commitments;
- adoption of new accounting standards affecting our industry;
- additions or departures of key personnel;
- introduction of new products by us or our competitors;
- sales of our common stock or other securities in the open market or in private placements; and
- other events or factors, many of which are beyond our control.

The stock market is subject to significant price and volume fluctuations. In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been initiated against such a company. Any such litigation initiated against us, whether or not successful, could result in substantial costs and diversion of our management's attention and resources, which could harm our business and financial condition.

***You may experience dilution of your ownership interests because of the future issuance of additional shares of our common stock or securities convertible into common stock.***

In the future, to finance our operations, including possible acquisitions or strategic transactions, we may issue equity securities, resulting in the dilution of the ownership interests of our present stockholders. We are currently authorized to issue an aggregate of 200,000,000 shares of common stock and 10,000,000 shares of preferred stock. As of December 1, 2018, there were 17,798,791 shares of common stock outstanding, 15,193,192 shares underlying warrants with a weighted average exercise price of \$2.21 per share (including 721,569 shares underlying pre-funded warrants with an exercise price of \$0.01), and 1,601,039 shares underlying options with a weighted average exercise price of \$4.35 per share. We may also issue additional shares of our common stock or other securities that are convertible into or exercisable for common stock in connection with hiring or retaining employees, or for other business purposes. The future issuance of any such additional shares of common stock or common stock equivalents may create downward pressure on the trading price of our common stock.

***The common stock is controlled by insiders.***

As of December 1, 2018, our executive officers and directors beneficially owned approximately 58.5% of our outstanding shares of common stock. Such concentrated control of our company may adversely affect the price of our common stock. If you acquire common stock, you may have no effective voice in the management of our company. Sales by our directors and executive officers or their affiliates, along with any other market transactions, could adversely affect the market price of our common stock.

***We do not intend to pay dividends for the foreseeable future.***

We have paid no dividends on our common stock to date and we do not anticipate that any dividends will be paid to holders of our common stock in the foreseeable future. While our future dividend policy will be based on the operating results and capital needs of the business, it is currently anticipated that any earnings will be retained to finance our future expansion and for the implementation of our business plan. The lack of a dividend can further affect the market value of our stock, and could significantly affect the value of any investment in our company.

***Our Certificate of Incorporation allows for our Board of Directors to create new series of preferred stock without further approval by our stockholders, which could adversely affect the rights of the holders of the common stock.***

Our Board of Directors has the authority to issue up to 10,000,000 shares of preferred stock and to fix and determine the relative rights and preferences of any such preferred stock without further stockholder approval. As a result, our Board of Directors could authorize the issuance of a series of preferred stock that would grant preferential rights to our assets upon liquidation, the right to receive dividend payments before dividends are distributed to the holders of common stock and the right to the redemption of the preferred shares, together with a premium, prior to the redemption of the common stock. In addition, our Board of Directors could authorize the issuance of a series of preferred stock that has greater voting power than the common stock or that is convertible into our common stock, which could decrease the relative voting power of the common stock or result in dilution to our existing stockholders.

***There is not an active liquid trading market for our common stock.***

While our common stock is listed on the Nasdaq National Market, there has not been a regular active trading market in our common stock, and we cannot give any assurance that an active trading market will develop. If an active market for our common stock were to develop, there is a significant risk that the stock price could fluctuate dramatically in the future in response to any of the following factors, some of which are beyond our control:

- the results of our preclinical and clinical trials;
- announcements by us or our competitors of significant contracts, acquisitions, strategic partnerships, joint ventures or capital commitments;
- general economic slowdowns;
- issuances by us or resales by others of large amounts of our common stock;
- variations in our quarterly operating results; and
- announcements that our revenue or income are below analysts' expectations.

***Sales of a substantial number of shares of our common stock in the public market, or the perception such sales may occur, could cause the market price of shares of our common stock to fall.***

Sales of a substantial number of shares of our common stock in the public market could occur at any time. These sales, or the perception in the market of such sales or that the holders of a large number of shares intend to sell shares, could reduce the market price of our shares of our common stock. As of December 1, 2018, we had 17,798,791 shares of common stock outstanding. This includes registered shares of common stock as well as 4,903,645 shares of our common stock which are available for resale under Rule 144 of the Securities Act of 1933, as amended, or the Securities Act.

**Item 1B. Unresolved Staff Comments**

Not Applicable

**Item 2. Properties**

We lease our offices at 11 Commerce Drive, Cranford, New Jersey 07016. The lease runs until April 30, 2019. The annual rent is \$26,000.

**Item 3. Legal Proceedings**

We are not involved in any litigation that we believe could have a material adverse effect on our financial position or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of our executive officers, threatened against or affecting our company or our officers or directors in their capacities as such.

In the future, we might from time to time become involved in litigation relating to claims arising from our ordinary course of business.

**Item 4. Mine Safety Disclosures**

Not applicable.

## PART II

### Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

#### Market Information

Our common stock trades on the Nasdaq Capital Market under the symbol "CTXR".

#### Recent Sales of Unregistered Securities

None.

#### Issuer Purchases of Equity Securities

We did not make any purchases of our Common Stock during the three months ended September 30, 2018, which is the fourth quarter of our fiscal year.

### Item 6. Selected Financial Data

Not required.

### Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

*The following discussion and analysis of our financial condition and results of operations should be read together with our financial statements and related notes included elsewhere in this annual report on Form 10-K. Management's discussion and analysis contains forward-looking statements, such as statements of our plans, objectives, expectations and intentions. Any statements that are not statements of historical fact are forward-looking statements. When used, the words "believe," "plan," "intend," "anticipate," "target," "estimate," "expect" and the like, and/or future tense or conditional constructions ("will," "may," "could," "should," etc.), or similar expressions, identify certain of these forward-looking statements. These forward-looking statements are subject to risks and uncertainties including those under "Risk Factors" in Item 1A in this Form 10-K that could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements. Our actual results and the timing of events could differ materially from those anticipated in these forward-looking statements as a result of several factors. The Company does not undertake any obligation to update forward-looking statements to reflect events or circumstances occurring after the filing date of this report.*

#### Historical Background

Citius Pharmaceuticals, Inc. ("Citius" or the "Company") is a specialty pharmaceutical company dedicated to the development and commercialization of critical care products targeting unmet needs with a focus on anti-infectives, cancer care and unique prescription products. On September 12, 2014, we acquired Citius Pharmaceuticals, LLC as a wholly-owned subsidiary.

On March 30, 2016, the Company acquired all of the outstanding stock of Leonard-Meron Biosciences, Inc. ("LMB") by issuing 1,942,456 shares of its common stock. As of March 30, 2016, the stockholders of LMB received approximately 41% of the issued and outstanding common stock of the Company. In addition, the Company converted the outstanding common stock warrants of LMB into 243,020 common stock warrants of the Company and converted the outstanding common stock options of LMB into 77,252 common stock options of the Company. Management estimated the fair value of the purchase consideration to be \$19,015,073.

In connection with the acquisition, the Company acquired net assets of \$17,428,277, including identifiable intangible assets of \$19,400,000 related to in-process research and development. The Company recorded goodwill of \$1,586,796 for the excess of the purchase price over the net assets acquired.

In-process research and development represents the value of LMB's leading drug candidate, which is an antibiotic solution used to treat catheter-related bloodstream infections. Goodwill represents the value of LMB's industry relationships and its assembled workforce. In-process research and development is expected to be amortized on a straight-line basis over a period of eight years commencing upon revenue generation. Goodwill will not be amortized, but will be tested at least annually for impairment.

Through September 30, 2018, the Company has devoted substantially all of its efforts to product development, raising capital, building infrastructure through strategic alliances and coordinating activities relating to its proprietary products. On July 1, 2016, the Company announced that it was discontinuing Suprenza, its first commercial product, for strategic reasons and not due to safety or regulatory concerns, and was focusing on the Phase 3 development of Mino-Lok, an antibiotic lock solution used to treat patients with catheter-related bloodstream infections, and the Phase 2b development of Hydro-Lido for hemorrhoids. The Company has not yet realized any revenues from its operations.

#### ***Patent and Technology License Agreement***

LMB has a patent and technology license agreement with Novel Anti-Infective Therapeutics, Inc., ("NAT") to develop and commercialize Mino-Lok on an exclusive worldwide sub licensable basis, as amended. Since May 2014, LMB has paid an annual maintenance fee, which began at \$30,000 and that increases over five years to \$90,000, where it is to remain until commercial sales of a product subject to the license commence. LMB will also pay annual royalties on net sales of licensed products, with royalties ranging from the mid-single digits to the low double digits. In limited circumstances in which the licensed product is not subject to a valid patent claim and a competitor is selling a competing product, the royalty rate is in the low-single digits. After a commercial sale is obtained, LMB must pay minimum aggregate annual royalties that increase in subsequent years. LMB must also pay NAT up to \$1,390,000 upon achieving specified regulatory and sales milestones. Finally, LMB must pay NAT a specified percentage of payments received from any sub licensees.

#### **Results of Operations for Year Ended September 30, 2018 compared to Year Ended September 30, 2017**

	<b>Year Ended September 30, 2018</b>	<b>Year Ended September 30, 2017</b>
Revenues	\$ -	\$ -
Operating expenses:		
Research and development	6,562,925	2,936,252
General and administrative	6,446,517	6,063,439
Stock-based compensation – general and administrative	779,701	986,620
Total operating expenses	<u>13,789,143</u>	<u>9,986,311</u>
Operating loss	(13,789,143)	(9,986,311)
Gain on extinguishment of liability	450,000	-
Other income	818,343	-
Gain on revaluation of derivative warrant liability	-	452,147
Interest expense	(15,838)	(850,789)
Net loss	<u>\$ (12,536,638)</u>	<u>\$ (10,384,953)</u>

#### **Revenues**

We did not generate any revenues for the years ended September 30, 2018 and 2017.

#### **Research and Development Expenses**

For the year ended September 30, 2018, research and development expenses were \$6,562,925 as compared to \$2,936,252 for the year ended September 30, 2017. The \$3,626,673 increase in 2018 was primarily due to the ongoing Phase 3 trial of Mino-Lok which commenced during the quarter ended March 31, 2018. Research and development costs for Mino-Lok were \$6,121,150 for the year ended September 30, 2018 as compared to \$2,688,937 for the year ended September 30, 2017, an increase of \$3,432,213. Research and development costs for our product candidate for the treatment of hemorrhoids were \$441,775 for the year ended September 30, 2018 as compared to \$247,315 for the year ended September 30, 2017, an increase of \$194,460. We expect that research and development expenses will continue to increase as we continue to focus on and expand our Phase 3 trial of Mino-Lok. We are actively seeking additional capital in order to fund our research and development efforts.

## **General and Administrative Expenses**

For the year ended September 30, 2018, general and administrative expenses were \$6,446,517 as compared to \$6,063,439 for the year ended September 30, 2017. The increase of \$383,078 in 2018 was primarily due to increased compensation costs, increased consulting fees incurred for financing activities and corporate development services, and increased investor relations fees. In addition, we incurred \$357,400 in settlement costs for the termination of the right of first refusal agreement with the underwriter of our 2017 Public Offering during the year ended September 30, 2018 compared to \$475,885 in settlement costs and \$104,138 in financial consulting expenses incurred related to the issuance of a unit purchase option during the year ended September 30, 2017.

## **Stock-based Compensation Expense**

For the year ended September 30, 2018, stock-based compensation expense was \$779,701 as compared to \$986,620 for the year ended September 30, 2017. Stock-based compensation expense includes the expense for options assumed in the March 30, 2016 acquisition of LMB, as well as grants to employees, directors and consultants. Stock-based compensation expense decreased by \$206,919 in comparison to the prior period as certain options have been fully expensed. At September 30, 2018, unrecognized total compensation cost of \$1,425,957 related to unvested awards is expected to be recognized over the next 2.3 years.

## **Other Income (Expense)**

During the year ended September 30, 2018, the Company recorded a \$450,000 gain on the extinguishment of a liability. The Company reversed an accrual for certain research and development expenses that was recorded in a prior year that will not be paid. In addition, during the year ended September 30, 2018, the Company recorded as other income a refund receivable in the amount of \$818,343 from the FDA for 2016 product and establishment fees. The fees previously paid by the Company exceeded the costs of the FDA's review of the associated Suprenza applications.

There was no gain on revaluation of derivative warrant liability for the year ended September 30, 2018 as there were no warrants classified as derivative warrants during the year. Gain on revaluation of derivative warrant liability for the year ended September 30, 2017 was \$452,147. The fair value of the derivative warrant liability fluctuated with changes in our stock price, volatility, remaining lives of the warrants, and interest rates.

Interest expense for the year ended September 30, 2018 was \$15,838 as borrowings from our Chairman were converted to common stock on August 8, 2017. Interest expense on the notes payable acquired in the acquisition of LMB and borrowings from our Chairman was \$850,789 for the year ended September 30, 2017, and includes net non-cash interest expense of \$762,078 due to the beneficial conversion feature on the conversion price of \$1,595,411 and the amortization of the previously recorded modification premium of \$833,333.

## **Net Loss**

For the year ended September 30, 2018, we incurred a net loss of \$12,536,638 compared to a net loss of \$10,384,953 for the year ended September 30, 2017. The \$2,151,685 increase in the net loss was primarily due to the \$3,626,673 increase in research and development expenses offset by the \$1,651,147 increase in net other income (expense).

**Results of Operations for Year Ended September 30, 2017 compared to Year Ended September 30, 2016**

	<b>Year Ended September 30, 2017</b>	<b>Year Ended September 30, 2016</b>
Revenues	<u>\$ -</u>	<u>\$ -</u>
Operating expenses:		
Research and development	2,936,252	2,933,199
General and administrative	6,063,439	3,783,941
Stock-based compensation – general and administrative	986,620	732,151
Total operating expenses	<u>9,986,311</u>	<u>7,449,291</u>
Operating loss	(9,986,311)	(7,449,291)
Interest income	-	806
Gain (loss) on revaluation of derivative warrant liability	452,147	(838,219)
Interest expense	(850,789)	(8,994)
Net loss	<u>\$ (10,384,953)</u>	<u>\$ (8,295,698)</u>

**Revenues**

We did not generate any revenues for the years ended September 30, 2017 and 2016.

**Research and Development Expenses**

For the year ended September 30, 2017, research and development expenses were \$2,936,252 as compared to \$2,933,199 during the year ended September 30, 2016. The \$3,053 increase in 2017 was primarily due to an increase of \$776,192 in costs incurred in the development of Mino-Lok offset by a decrease of \$773,139 in costs incurred in the development of our product for the treatment of hemorrhoids and costs related to Suprenza, including \$292,575 received in 2016 from Alpex as reimbursement for regulatory filing fees. We are actively seeking to raise additional capital in order to fund our research and development efforts.

**General and Administrative Expenses**

For the year ended September 30, 2017, general and administrative expenses were \$6,063,439 as compared to \$3,783,941 during the year ended September 30, 2016. The \$2,279,498 increase in 2017 was primarily due to the acquisition of LMB on March 30, 2016, which resulted in increased compensation costs, increased consulting fees incurred for financing activities and corporate development services, and increased investor relations fees. In addition, the year ended September 30, 2016 only includes six months of expenses for LMB as the acquisition was completed on March 30, 2016.

**Stock-based Compensation Expense**

For the year ended September 30, 2017, stock-based compensation expense was \$986,620 as compared to \$732,151 for the year ended September 30, 2016. The \$254,469 increase in expense includes the expense for unvested options assumed in the acquisition of LMB, as well as new grants to directors, employees and consultants.

**Other Income (Expense)**

There was no interest income earned on our cash balances for the year ended September 30, 2017 and only \$806 in interest income earned for the year ended September 30, 2016.

Gain (loss) on revaluation of derivative warrant liability for the year ended September 30, 2017 was \$452,147 compared to \$(838,219) for the year ended September 30, 2016. The fair value of the derivative warrant liability fluctuates with changes in our stock price, volatility, remaining lives of the warrants, and interest rates. The gain for the year ended September 30, 2017 was primarily due to a decrease in the fair value of our stock from \$9.45 per share at September 30, 2016 to \$4.125 per share at August 8, 2017 when the final derivative warrants were reclassified to equity. The loss for the year ended September 30, 2016 was primarily due to an increase in the fair value of our common stock from \$8.10 at September 30, 2015 to \$9.45 at September 30, 2016. At September 30, 2017, the Company has no outstanding warrants that are considered to be derivative instruments.

Interest expense on the notes payable acquired in the acquisition of LMB and recent borrowings from our Chairman was \$850,789 for the year ended September 30, 2017, and includes net non-cash interest expense of \$762,078 due to the beneficial conversion feature on the conversion price of \$1,595,411 and the amortization of the previously recorded modification premium of \$833,333. After the August 8, 2017 conversions of debt to common stock, the Company has \$172,970 in outstanding notes payable at September 30, 2017. Interest expense on the notes payable acquired in the acquisition of LMB was \$8,994 for the year ended September 30, 2016.

#### **Net Loss**

For the year ended September 30, 2017, we incurred a net loss of \$10,384,953 compared to a net loss for the year ended September 30, 2016 of \$8,295,698. The \$2,089,255 increase in the net loss was primarily due to the \$2,279,498 increase in general and administrative expenses and the \$841,795 increase in interest expense offset by the \$1,290,366 change in the (gain) loss on revaluation of the derivative warrant liability.

### **LIQUIDITY AND CAPITAL RESOURCES**

#### **Going Concern Uncertainty and Working Capital**

Citius has incurred losses of \$12,536,638, \$10,384,953 and \$8,295,698 for the years ended September 30, 2018, 2017 and 2016, respectively. At September 30, 2018, Citius had an accumulated deficit of \$40,257,838. Citius' net cash used in operations during the years ended September 30, 2018, 2017 and 2016, was \$11,318,138, \$7,971,205 and \$5,900,421, respectively.

Our independent registered accountants report on our September 30, 2018 consolidated financial statements contains an emphasis of a matter regarding substantial doubt about our ability to continue as a going concern and that the consolidated financial statements have been prepared assuming we will continue as a going concern and do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets, or the amounts and classification of liabilities that may result if we do not continue as a going concern.

As of September 30, 2018, Citius had working capital of \$6,875,238. Our limited working capital was attributable to the operating losses incurred by the Company since inception offset by our capital raising activities. At September 30, 2018, Citius had cash and cash equivalents of \$9,184,003 available to fund its operations. The Company's only source of cash flow since inception has been from financing activities. During the years ended September 30, 2018, 2017 and 2016, the Company received net proceeds of \$17,298,033, \$6,673,088 and \$5,427,688, respectively from the issuance of equity. We also received \$4,210,000 from the issuance of notes payable to our Chairman of the Board, Mr. Leonard Mazur, during the year ended September 30, 2017. Mr. Mazur converted the notes payable to common stock on August 8, 2017. Our primary uses of operating cash were for product development and commercialization activities, regulatory expenses, employee compensation, consulting fees, legal and accounting fees, and insurance and travel expenses.

#### **Financing Activities**

During the year ended September 30, 2016, the Company sold 290,000 units for a purchase price of \$8.10 per unit and 17,778 units for a purchase price of \$9.00 per unit for gross proceeds of \$2,509,000. Each unit consisted of one share of common stock and one five-year warrant to purchase a share of common stock at an exercise price of \$9.00.

On March 22, 2016, the Company sold 333,333 shares of Common Stock at \$9.00 per share to its Chairman of the Board, Leonard Mazur, for gross proceeds of \$3,000,000.

The Board of Directors authorized revolving demand promissory notes with Leonard Mazur in an aggregate principal amount of up to \$2,500,000 that accrue interest at the prime rate plus 1%. On September 7, 2016, the Company issued a \$500,000 note. The Company issued \$2,000,000 of additional notes through the period ended May 10, 2017. On May 10, 2017, the notes were converted into a \$2,500,000 convertible promissory note that is convertible into shares of common stock, at the sole discretion of Mr. Mazur, at a conversion price equal to 75% of the price per share paid by investors in the Company's 2017 registered public offering. In connection with the modification of the note, the Company recorded a charge of \$833,333 to additional paid-in capital and increased the carrying value of the notes to \$3,333,333 which is the fair value of the common stock issuable on conversion. On August 8, 2017, Leonard Mazur converted the \$2,500,000 principal balance and accrued interest of \$63,174 into 828,500 shares of common stock.

On May 10, 2017 and June 23, 2017, the Company executed a \$1,500,000 future advance convertible promissory note and a \$1,000,000 future advance convertible promissory note, respectively, with Leonard Mazur that accrue interest at the prime rate plus 1%. The notes are convertible into shares of common stock, at the sole discretion of Mr. Mazur, at a conversion price equal to 75% of the price per share paid by investors in the Company's 2017 registered public offering. On August 8, 2017, Leonard Mazur converted the outstanding \$2,210,000 principal balances and accrued interest of \$13,066 into 718,567 shares of common stock.

In February 2017, the Company sold 128,017 units at \$6.00 per unit for gross proceeds of \$768,100. Each unit consisted of one share of common stock and a five-year warrant to purchase one share of common stock at an exercise price of \$8.25 per share. On June 8, 2017, the Company entered into agreements where it was released from the restrictions included in the purchase agreements. In exchange, the Company agreed to reprice the sale of the units to \$4.125 per unit and reprice the warrants to an exercise price of \$4.125 per share. During the year ended September 30, 2017, the Company issued an additional 58,191 shares of common stock to the investors.

On August 8, 2017, the Company closed an underwritten public offering of 1,648,484 shares of common stock and warrants to purchase 1,648,484 shares of common stock at an offering price of \$4.125 per share and \$0.01 per warrant. The warrants have a per share exercise price of \$4.125, are exercisable immediately and will expire five years from the date of issuance. The gross proceeds to Citius from this offering were \$6,802,469, before deducting underwriting discounts and commissions and other offering expenses of \$685,573. The Company granted the underwriters a 45-day option to purchase up to an additional 247,272 shares of common stock and warrants to purchase 247,272 shares of common stock to cover over-allotments, if any. On August 8, 2017, the underwriters partially exercised the over-allotment to purchase an additional 247,272 warrants.

On December 19, 2017, the Company closed a registered direct offering for the sale of 1,280,360 shares of common stock at \$4.6925 per share for gross proceeds of \$6,008,089. Simultaneously, the Company privately sold and issued to the investors 640,180 immediately exercisable five and a half year warrants with an exercise price of \$4.63 per share. Net proceeds from the offering were \$5,482,523.

On March 29, 2018, the Company closed a registered direct offering for the sale of 669,504 shares of common stock at \$2.985 per share for gross proceeds of \$1,998,469. Simultaneously, the Company privately sold and issued to investors 669,504 immediately exercisable five and a half year warrants with an exercise price of \$2.86 per share. Net proceeds from the offering were \$1,763,576.

On August 13, 2018, the Company closed an offering for the sale of (i) 5,521,569 units, each unit consisted of one share of common stock and one immediately exercisable five-year warrant to purchase one share at \$1.15 per share, and (ii) 2,321,569 pre-funded units, each pre-funded unit consisted of one pre-funded warrant to purchase one share of common stock and one immediately exercisable five-year warrant to purchase one share at \$1.15 per share. The exercise price of the pre-funded warrant is \$0.01 and the pre-funded warrants do not expire. The offering price was \$1.275 per unit and \$1.265 per pre-funded unit. Net proceeds from the offering were \$8,926,786.

During the year ended September 30, 2018, an aggregate of 272,767 of the August 2017 public offering warrants were exercised at \$4.125 per share for net proceeds of \$1,125,148.

We expect that we will have sufficient capital to continue our operations through June 2019. We plan to raise additional capital in the future to support our operations. There is no assurance, however, that we will be successful in raising the needed capital or that the proceeds will be received in a timely manner to fully support our operations.

## **Inflation**

Our management believes that inflation has not had a material effect on our results of operations.

## **Off Balance Sheet Arrangements**

We do not have any off-balance sheet arrangements.

## **CRITICAL ACCOUNTING POLICIES**

Our discussion and analysis of our financial condition and results of operations is based on our financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities and expenses and related disclosure of contingent assets and liabilities. We review our estimates on an ongoing basis. We base our estimates on historical experience and on various other factors that we believe to be reasonable under the circumstances. Actual results may differ from these estimates. We believe the judgments and estimates required by the following accounting policies to be critical in the preparation of our financial statements.

### ***Research and Development***

Research and development costs, including upfront fees and milestones paid to collaborators who are performing research and development activities under contractual agreement with us, are expensed as incurred. We defer and capitalize our nonrefundable advance payments that are for research and development activities until the related goods are delivered or the related services are performed. When we are reimbursed by a collaboration partner for work we perform, we record the costs incurred as research and development expenses and the related reimbursement as a reduction to research and development expenses in our statement of operations. Research and development expenses primarily consist of clinical and non-clinical studies, materials and supplies, third-party costs for contracted services, and payments related to external collaborations and other research and development related costs.

### ***In-process Research and Development and Goodwill***

In process research and development represents the value of LMB's leading drug candidate, Mino-Lok, an antibiotic lock solution in phase 3 clinical development, which if approved, would be used to assist in the treatment of catheter related bloodstream infections and is expected to be amortized on a straight-line basis over 8 years upon revenue generation. Goodwill represents the value of LMB's industry relationships and its assembled workforce. Goodwill will not be amortized and will be tested at least annually for impairment.

The Company reviews intangible assets annually to determine if any adverse conditions exist or a change in circumstances has occurred that would indicate impairment or a change in the remaining useful life of any intangible asset. If the carry value of an asset exceeds its undiscounted cash flows, the Company writes down the carrying value of the intangible asset to its fair value for the period identified. No triggering events occurred since the acquisition of LMB that would suggest a potential impairment may have occurred through September 30, 2018.

The Company evaluates the recoverability of goodwill annually or more frequently if events or changes in circumstances indicate that the carrying value of an asset may be impaired. Goodwill is first qualitatively assessed to determine whether further impairment testing is necessary. Factors that management considers in the assessment include macroeconomic conditions, industry and market conditions, overall financial performance, (both current and projected), changes in management and strategy as well as changes in the composition of the carrying amount of net assets. If this qualitative assessment indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, a two-step process is then performed.

The Company performed a qualitative assessment for its 2018 analysis of goodwill. Based on this assessment, management does not believe that it is more likely than not, that the carrying value of the reporting unit exceeds its fair value. Accordingly, no further testing was performed as management believes that there are no impairment issues with respect to goodwill as of September 30, 2018.

### ***Income Taxes***

We follow accounting guidance regarding the recognition, measurement, presentation and disclosure of uncertain tax positions in the financial statements. Tax positions taken or expected to be taken in the course of preparing our tax returns are required to be evaluated to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authorities. Tax positions not deemed to meet a more-likely-than-not threshold would be recorded in the financial statements.

We recognize deferred tax assets and liabilities based on differences between the financial reporting and tax basis of assets and liabilities using the enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. We provide a valuation allowance for deferred tax assets for which we do not consider realization of such assets to be more likely than not.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of Citius Pharmaceuticals, Inc.:

### *Opinion on the Financial Statements*

We have audited the accompanying consolidated balance sheets of Citius Pharmaceuticals, Inc. (the “Company”) as of September 30, 2018 and 2017, and the related consolidated statements of operations, changes in stockholders’ equity (deficit) and cash flows for each of the years in the three-year period ended September 30, 2018, and the related notes to the consolidated financial statements (collectively, the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of September 30, 2018 and 2017, and the results of its operations and its cash flows for each of the years in the three-year period ended September 30, 2018, in conformity with accounting principles generally accepted in the United States of America.

### *Emphasis of Matter – Ability to Continue as a Going Concern*

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the financial statements, the Company has suffered recurring losses from operations, has negative cash flows from operations and a significant accumulated deficit. These conditions raise substantial doubt about the Company’s ability to continue as a going concern. Management’s plans in regard to these matters are described in Note 2. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

### *Basis for Opinion*

These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Wolf & Company, P.C.

Boston, Massachusetts  
December 11, 2018

We have served as the Company’s auditor since 2014.

**CITIUS PHARMACEUTICALS, INC.**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE YEARS ENDED SEPTEMBER 30, 2018, 2017 AND 2016**

**1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION**

***Business***

Citius Pharmaceuticals, Inc. (“Citius” or the “Company”) is a specialty pharmaceutical company dedicated to the development and commercialization of critical care products targeting unmet needs with a focus on anti-infectives, cancer care and unique prescription products.

On March 30, 2016, Citius acquired Leonard-Meron Biosciences, Inc. (“LMB”) as a wholly-owned subsidiary (see “Acquisition of Leonard-Meron Biosciences, Inc.” below). Since its inception, the Company has devoted substantially all of its efforts to business planning, research and development, recruiting management and technical staff, and raising capital.

Citius is subject to a number of risks common to companies in the pharmaceutical industry including, but not limited to, risks related to the development by Citius or its competitors of research and development stage products, market acceptance of its products, competition from larger companies, dependence on key personnel, dependence on key suppliers and strategic partners, the Company’s ability to obtain additional financing and the Company’s compliance with governmental and other regulations.

***Acquisition of Leonard-Meron Biosciences, Inc.***

On March 30, 2016, the Company acquired all of the outstanding stock of LMB by issuing 1,942,456 shares of Company common stock. As of March 30, 2016, the stockholders of LMB received approximately 41% of the issued and outstanding common stock of the Company. In addition, the Company converted the outstanding common stock warrants of LMB into 243,020 common stock warrants of the Company and converted the outstanding common stock options of LMB into 77,252 common stock options of the Company.

The Company recorded goodwill of \$1,586,796 for the excess of the purchase price over the net assets acquired.

See report of independent accounting firm

Unaudited pro forma operating results for the year ended September 30, 2016, assuming the acquisition of LMB had been made as of October 1, 2015, are as follows:

Revenues	\$ —
Net loss	<u>\$ (11,548,647)</u>
Net loss per share – basic and diluted	<u>\$ (2.52)</u>

### ***Basis of Presentation***

The accompanying consolidated financial statements include the operations of Citius Pharmaceuticals, Inc., and its wholly-owned subsidiaries, Citius Pharmaceuticals, LLC and LMB since the March 30, 2016 acquisition. All significant inter-company balances and transactions have been eliminated in consolidation.

## **2. GOING CONCERN UNCERTAINTY AND MANAGEMENT'S PLAN**

The accompanying consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company experienced negative cash flows from operations of \$11,318,138, \$7,971,205 and \$5,900,421, for the years ended September 30, 2018, 2017 and 2016, respectively. The Company has no revenue and has relied on proceeds from equity transactions and debt to finance its operations. At September 30, 2018, the Company had limited capital to fund its operations. This raises substantial doubt about the Company's ability to continue as a going concern within one year after the date that the accompanying consolidated financial statements are issued.

The Company plans to raise capital through equity financings from outside investors as well as raise additional funds from existing investors. There is no assurance, however, that the Company will be successful in raising the needed capital and, if funding is available, that it will be available on terms acceptable to the Company. The accompanying consolidated financial statements do not include any adjustments that might result from the outcome of the above uncertainty.

## **3. PATENT AND TECHNOLOGY LICENSE AGREEMENT**

LMB has a patent and technology license agreement with Novel Anti-Infective Therapeutics, Inc., ("NAT") to develop and commercialize Mino-Lok on an exclusive, worldwide sub licensable basis, as amended. LMB pays an annual maintenance fee in June until commercial sales of a product subject to the license commence. The Company recorded maintenance fee expense of \$75,000, \$50,000 and \$45,000 in 2018, 2017 and 2016, respectively under the terms of this agreement.

LMB will also pay annual royalties on net sales of licensed products, with royalties ranging from the mid-single digits to the low double digits. In limited circumstances in which the licensed product is not subject to a valid patent claim and a competitor is selling a competing product, the royalty rate is in the low-single digits. After a commercial sale is obtained, LMB must pay minimum aggregate annual royalties of \$100,000 in the first commercial year which is prorated for a less than 12-month period, increasing \$25,000 per year to a maximum of \$150,000 annually. LMB must also pay NAT up to \$1,390,000 upon achieving specified regulatory and sales milestones. Finally, LMB must pay NAT a specified percentage of payments received from any sub licensees.

Unless earlier terminated by NAT, based on the failure to achieve certain development and commercial milestones, the license agreement remains in effect until the date that all patents licensed under the agreement have expired and all patent applications within the licensed patent rights have been cancelled, withdrawn or expressly abandoned.

See report of independent accounting firm

#### **4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

A summary of the significant accounting policies followed by the Company in the preparation of the consolidated financial statements is as follows:

##### ***Use of Estimates***

The process of preparing financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues and expenses during the reporting period.

##### ***Cash and Cash Equivalents***

The Company considers all highly liquid instruments with maturities of less than three months at the time of purchase to be cash equivalents. From time to time, the Company may have cash balances in financial institutions in excess of insurance limits. The Company has never experienced any losses related to these balances.

##### ***Property and Equipment***

Property and equipment are valued at cost and are being depreciated over their useful lives using the straight-line method for financial reporting purposes. Routine maintenance and repairs are charged to expense as incurred. Expenditures which materially increase the value or extend useful lives are capitalized. Property and equipment are depreciated over estimated useful lives of three to five years.

##### ***Research and Development***

Research and development costs, including upfront fees and milestones paid to collaborators who are performing research and development activities under contractual agreement with the Company, are expensed as incurred. The Company defers and capitalizes its nonrefundable advance payments that are for research and development activities until the related goods are delivered or the related services are performed. When the Company is reimbursed by a collaboration partner for work the Company performs, it records the costs incurred as research and development expenses and the related reimbursement as a reduction to research and development expenses in its consolidated statement of operations. Research and development expenses primarily consist of clinical and non-clinical studies, materials and supplies, third-party costs for contracted services, and payments related to external collaborations and other research and development related costs.

See report of independent accounting firm

### ***In-process Research and Development and Goodwill***

In-process research and development represents the value of LMB's leading drug candidate which is an antibiotic solution used to treat catheter-related bloodstream infections (Mino-Lok) and is expected to be amortized on a straight-line basis over a period of eight years commencing upon revenue generation. Goodwill represents the value of LMB's industry relationships and its assembled workforce. Goodwill will not be amortized but will be tested at least annually for impairment.

The Company reviews intangible assets annually to determine if any adverse conditions exist or a change in circumstances has occurred that would indicate impairment or a change in the remaining useful life of any intangible asset. If the carrying value of an asset exceeds its undiscounted cash flows, the Company writes down the carrying value of the intangible asset to its fair value in the period identified. No triggering events occurred since the acquisition of LMB that would suggest that a potential impairment may have occurred through September 30, 2018.

The Company evaluates the recoverability of goodwill annually or more frequently if events or changes in circumstances indicate that the carrying value of an asset might be impaired. Goodwill is first qualitatively assessed to determine whether further impairment testing is necessary. Factors that management considers in this assessment include macroeconomic conditions, industry and market considerations, overall financial performance (both current and projected), changes in management and strategy and changes in the composition or carrying amount of net assets. If this qualitative assessment indicates that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, a two-step process is then performed. The two-step test first compares the fair value of the reporting unit to its carrying value. If the fair value exceeds the carrying value, no impairment exists, and the second step is not performed. If the fair value of the reporting unit is less than its carrying value, an impairment loss is recorded as part of the second step of the test, to the extent that the implied fair value of the reporting unit goodwill is less than the carrying value.

The Company performed a qualitative assessment for our 2018 analysis of goodwill. Based on this assessment, management does not believe that it is more likely than not that the carrying value of the reporting unit exceeds its fair value. Accordingly, no further testing was performed as management believes that there are no impairment issues in regards to goodwill as of September 30, 2018.

### ***Patents and Trademarks***

Certain costs of outside legal counsel related to obtaining trademarks for the Company are capitalized. Patent costs are amortized over the legal life of the patents, generally twenty years, starting at the patent issuance date. There are no capitalized patents and trademarks as of September 30, 2018.

The costs of unsuccessful and abandoned applications are expensed when abandoned. The cost of maintaining existing patents are expensed as incurred.

### ***Stock-Based Compensation***

The Company recognizes compensation costs resulting from the issuance of stock-based awards to employees and directors as an expense in the consolidated statement of operations over the requisite service period based on the fair value for each stock award on the grant date, net of actual forfeitures. The fair value of each option grant is estimated as of the date of grant using the Black-Scholes option pricing model. Due to its limited operating history, limited number of sales of its common stock and limited history of its shares being publicly traded, the Company estimates its volatility in consideration of a number of factors including the volatility of comparable public companies. Because our stock options have characteristics significantly different from those of traded options, and because changes in the input assumptions can materially affect the fair value estimate, the existing model may not necessarily provide a reliable single measure of fair value of our stock options.

The Company recognizes compensation costs resulting from the issuance of stock-based awards to non-employees as an expense in the consolidated statement of operations over the service period based on the measurement of fair value for each stock award.

See report of independent accounting firm

### ***Derivative Instruments***

The Company generally does not use derivative instruments to hedge exposures to cash-flow or market risks; however, certain warrants to purchase common stock that did not meet the requirements for classification as equity were classified as liabilities. In such instances, net-cash settlement was assumed for financial reporting purposes, even when the terms of the underlying contracts do not provide for a net-cash settlement. Such financial instruments were initially recorded at fair value with subsequent changes in fair value charged (credited) to operations in each reporting period. When these instruments subsequently met the requirements for classification as equity, the Company reclassified the fair value to equity.

### ***Income Taxes***

The Company follows accounting guidance regarding the recognition, measurement, presentation and disclosure of uncertain tax positions in the consolidated financial statements. Tax positions taken or expected to be taken in the course of preparing our tax returns are required to be evaluated to determine whether the tax positions are “more-likely-than-not” of being sustained by the applicable tax authorities. Tax positions not deemed to meet a more-likely-than-not threshold would be recorded in the consolidated financial statements. There are no uncertain tax positions that require accrual or disclosure as of September 30, 2018.

Any interest or penalties are charged to expense. During the years ended September 30, 2018, 2017 and 2016, the Company did not recognize any interest and penalties. Tax years subsequent to September 30, 2014 are subject to examination by federal and state authorities.

We recognize deferred tax assets and liabilities based on differences between the financial reporting and tax basis of assets and liabilities, and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using the enacted tax rates and laws that are expected to be in effect when the differences are expected to reverse. We provide a valuation allowance, if necessary, for deferred tax assets for which we do not consider realization of such assets to be “more-likely-than-not”. The deferred tax benefit or expense for the period represents the change in the deferred tax asset or liability from the beginning to the end of the period.

### ***Basic and Diluted Net Loss per Common Share***

Basic and diluted net loss per common share is computed by dividing net loss in each period by the weighted average number of shares of common stock outstanding during such period. For the periods presented, common stock equivalents, consisting of options, warrants and convertible securities were not included in the calculation of the diluted loss per share because they were anti-dilutive.

### ***Fair Value of Financial Instruments***

The financial statements include various estimated fair value information. Financial instruments are initially recorded at historical cost. If subsequent circumstances indicate that a decline in the fair value of a financial asset is other than temporary, the financial asset is written down to its fair value.

Unless otherwise indicated, the fair values of financial instruments approximate their carrying amounts. By their nature, all financial instruments involve risk, including credit risk for non-performance by counterparties. The fair values of cash and cash equivalents, accounts payable, accrued interest, accrued expenses, notes payable and due to related party approximate their recorded amounts because of their relatively short settlement terms.

See report of independent accounting firm

The Company groups its assets and liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

- Level 1: Valuation is based on quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities generally include debt and equity securities that are traded in an active exchange market. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.
- Level 2: Valuation is based on observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. For example, Level 2 assets and liabilities may include debt securities with quoted prices that are traded less frequently than exchange-traded instruments.
- Level 3: Valuation is based on unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain private equity investments and long-term derivative contracts.

The Company's financial liabilities measured at fair value as of September 30, 2016 consisted solely of the derivative warrant liability which was classified as Level 3 in fair value hierarchy (see Note 6). The Company used a valuation method, the Black-Scholes option pricing model, and the requisite assumptions in estimating the fair value for the warrants considered to be derivative instruments. The Company has no financial assets measured at fair value as of September 30, 2018 and September 30, 2017.

The Company may also be required, from time to time, to measure certain other financial assets at fair value on a nonrecurring basis. These adjustments to fair value usually result from application of lower-of-cost-or-market accounting or write-downs of individual assets. There were no such adjustments in the years ended September 30, 2018, 2017 and 2016.

#### ***Segment Reporting***

The Company currently operates as a single segment.

#### ***Concentrations of Credit Risk***

The Company has no significant off-balance-sheet concentration of credit risk such as foreign exchange contracts, option contracts or other hedging arrangements.

#### ***Recently Issued Accounting Standards***

In June 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2018-07, Compensation – Stock Compensation (Topic 718): Improvements to Non-employee Share-Based Payment Accounting. ASU 2018-07 expands the scope of Topic 718 to include share-based payment transactions for acquiring goods and services from nonemployees. An entity should apply the requirements of Topic 718 to non-employees awards except for specific guidance on inputs to an option pricing model and the attribution of cost. The amendments in this ASU are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted. The Company is in the process of evaluating the impact of this ASU on its consolidated results of operations, financial position or disclosures.

### **5. NOTES PAYABLE**

A summary of notes payable outstanding as of September 30, 2018 and 2017 is as follows:

	<b>2018</b>	<b>2017</b>
Demand notes payable – Leonard Mazur	\$ 160,470	\$ 160,470
Demand notes payable – Myron Holubiak	12,500	12,500
Notes payable	<u>\$ 172,970</u>	<u>\$ 172,970</u>

See report of independent accounting firm

### *Notes Payable - Related Parties*

On March 30, 2016, the Company assumed \$772,970 of demand notes payable in the acquisition of LMB, including \$760,470 to our Chairman, Leonard Mazur, and \$12,500 to our Chief Executive Officer, Myron Holubiak. Notes with a principal balance of \$704,000 accrue interest at the “Prime Rate”, as published in the Wall Street Journal on the last day of each month plus 1% and notes with a principal balance of \$68,970 accrue interest at 12% per annum. In April 2016, \$600,000 of the “Prime Rate” plus 1% demand notes payable and accrued interest of \$1,985 was repaid to Leonard Mazur.

The Board of Directors authorized revolving demand promissory notes with Leonard Mazur in an aggregate principal amount of up to \$2,500,000 that accrued interest at the prime rate plus 1%. On September 7, 2016, the Company issued a \$500,000 note. The Company issued \$2,000,000 of additional notes through the period ended May 10, 2017. On May 10, 2017, the notes were converted into a \$2,500,000 convertible promissory note. The note was convertible into shares of common stock, at the sole discretion of Mr. Mazur, at a conversion price equal to 75% of the price per share paid by investors in the Company’s 2017 registered public offering. In connection with the modification of the note, in 2017 the Company recorded a charge of \$833,333 to additional paid-in capital and increased the carrying value of the notes to \$3,333,333 which was the fair value of the common stock issuable on conversion. On August 8, 2017, Leonard Mazur converted the \$2,500,000 principal balance and accrued interest of \$63,174 into 828,500 shares of common stock.

On May 10, 2017 and June 23, 2017, the Company executed future advance convertible promissory notes with Leonard Mazur that were scheduled to mature on December 31, 2017 and accrue interest at the prime rate plus 1%. The notes were convertible into shares of common stock, at the sole discretion of Mr. Mazur, at a conversion price equal to 75% of the price per share paid by investors in the Company’s 2017 registered public offering. On August 8, 2017, Leonard Mazur converted the outstanding \$2,210,000 principal balances and accrued interest of \$13,066 into 718,567 shares of common stock.

In connection with the conversions, the Company recorded net non-cash interest expense of \$762,078 due to the beneficial conversion feature on the conversion price of \$1,595,411 and the amortization of the previously recorded modification premium of \$833,333.

The Company evaluated all terms of the future advance convertible promissory notes, including the Change in Control provision, to identify any embedded features that required bifurcation and recording as derivative instruments. The Company determined that there were no such features requiring separate accounting.

### *Interest Expense*

Interest expense on notes payable for the years ended September 30, 2018, 2017 and 2016 was \$15,645, \$850,789 and \$8,994, respectively.

## **6. DERIVATIVE WARRANT LIABILITY**

Derivative financial instruments are recognized as a liability on the consolidated balance sheet and measured at fair value.

The Company performed valuations of the warrants using a probability weighted Black-Scholes option pricing model which value was also compared to a Binomial Option Pricing Model for reasonableness. This model requires input of assumptions including the risk-free interest rates, volatility, expected life and dividend rates, and has also considered the likelihood of “down-round” financings. Selection of these inputs involves management’s judgment and may impact net income. Due to our limited operating history and limited number of sales of our common stock, we estimate our volatility based on a number of factors including the volatility of comparable publicly traded pharmaceutical companies. The volatility factor used in the Black-Scholes option pricing model has a significant effect on the resulting valuation of the derivative liabilities on our balance sheet.

See report of independent accounting firm

The table below presents the changes in the derivative warrant liability for the years ended September 30, 2017 and 2016, which were measured at fair value on a recurring basis and classified as Level 3 in the fair value hierarchy (see Note 4). No warrants are classified as derivative warrant liabilities as of September 30, 2018 and 2017:

	<b>2017</b>	<b>2016</b>
Derivative warrant liability, beginning of year	\$ 1,681,973	\$ 738,955
Fair value of warrants issued	641,385	1,198,564
Total realized/unrealized losses (gains) included in net loss	(452,147)	838,219
Reclassification of liability to additional paid-in capital	(1,871,211)	(1,093,765)
Derivative warrant liability, end of year	<u>\$ -</u>	<u>\$ 1,681,973</u>

## 7. COMMON STOCK, STOCK OPTIONS AND WARRANTS

### *Private Offerings and Common Stock Issued for Services and Release Agreements*

During the year ended September 30, 2016, the Company sold 290,000 Units for a purchase price of \$8.10 per Unit and 17,778 Units for a purchase price of \$9.00 per Unit for gross proceeds of \$2,509,000. There was no placement agent for these private placements and other cash expenses related to the placements were \$81,312. In connection with these placements, the Company credited \$1,229,124 to stockholders' equity and \$1,198,564 to derivative warrant liability.

On March 22, 2016, the Company sold 333,333 shares of common stock at \$9.00 per share to its Chairman of the Board, Leonard Mazur, for gross proceeds of \$3,000,000. There were no expenses related to this placement.

In February 2017, the Company completed its 2016 Offering. The Company sold 128,017 units at \$6.00 per unit for gross proceeds of \$768,100. Each unit consisted of (i) one share of common stock and (ii) a five-year warrant to purchase one share of common stock at an exercise price of \$8.25 per share. The placement agent received a 10% cash commission on the gross proceeds, an expense allowance equal to 3% of the proceeds, and warrants to purchase 12,802 shares of common stock at an exercise price of \$8.25 per share. The estimated fair value of the 128,017 warrants issued to the investors was \$587,592 and the estimated fair value of the 12,802 warrants issued to the placement agent was \$58,759. The placement agent commissions and expense allowance was \$99,853. Other costs of the placement were \$176,896.

See report of independent accounting firm

During January 2017, the Company issued 29,729 shares of its common stock for investor relations services. The \$298,774 fair value of the common stock was expensed during the year ended September 30, 2017.

On May 5, 2017, the Company issued 11,400 shares of common stock valued at \$77,748 in connection with a settlement agreement and release with a consultant that had an agreement with Leonard-Meron Biosciences. The Company expensed the \$77,748 as a settlement expense during the year ended September 30, 2017.

On June 7, 2017, the Company entered into a release agreement with the placement agent for the 2016 Offering. The placement agent consented to future financings and waived certain covenants contained in the 2016 Offering agreements. As consideration for the release, the Company issued 6,668 shares of common stock valued at \$45,476 to the placement agent. The Company expensed the \$45,476 as a settlement expense during the year ended September 30, 2017.

On June 8, 2017, the Company entered into release agreements with the investors in the 2016 Offering where each investor released the Company from the restrictions included in the unit purchase agreements. In exchange, the Company agreed that (i) in the event that a financing is conducted at a price per share or price per unit lower than \$6.00, then the Company will issue additional shares to each investor sufficient to effectively reprice the sale of the 2016 Offering units to the lower price; (ii) in the event that the financing is conducted at a price per share or price per unit less than the \$8.25 exercise price of the warrants issued in the 2016 Offering then the exercise price of the warrants shall be reduced to the lower price; and (iii) the Company will give each investor no less than 6 hours of notice before the closing of any subsequent financing, through and including the Company's 2017 registered public offering, and each investor shall have a 6-hour option to purchase up to 20% of the securities sold in such offering. In connection with these agreements the Company reclassified the \$641,385 fair value of the 140,819 warrants issued in the 2016 Offering to derivative warrant liability on June 8, 2017 (see Note 6). On August 8, 2017, the Company completed the 2017 public offering and issued 58,191 shares of common stock to the investors in the 2016 Offering to reprice the sale of the 2016 Offering units to \$4.125 per unit and repriced the 2016 Offering Warrants to an exercise price of \$4.125 per share. During the year ended September 30, 2017, the Company recorded a settlement expense of \$161,771 in connection with the issuance of the additional 58,191 shares of common stock and reclassified the current fair value of the warrants to additional paid-in capital.

On February 7, 2018, the Company issued 22,200 shares of common stock for services provided by two consultants and expensed the \$88,800 fair value of the common stock issued.

On April 1, 2018, the Company issued 10,000 shares of common stock for services provided by a consultant and expensed the \$31,000 fair value of the common stock issued.

#### ***2017 Public Offering and Release Agreement***

On August 8, 2017, the Company closed an underwritten public offering of 1,648,484 shares of common stock and warrants to purchase 1,648,484 shares of common stock at an offering price of \$4.125 per share and \$0.01 per warrant. The warrants have a per share exercise price of \$4.125, are exercisable immediately and will expire five years from the date of issuance. Gross proceeds were \$6,802,469, before deducting underwriting discounts and commissions and other estimated offering expenses of \$685,573. The Company granted the underwriters a 45-day option to purchase up to an additional 247,272 shares of common stock and warrants to purchase 247,272 shares of common stock to cover over-allotments, if any. On August 8, 2017, the underwriters partially exercised the over-allotment to purchase an additional 247,272 warrants. The estimated fair value of the 1,895,756 warrants issued to the investors was \$4,160,195 and the estimated fair value of the 65,940 warrants issued to the underwriters was \$142,419.

On November 7, 2017, the Company entered into a release agreement with the underwriter. The Company had previously granted a right of first refusal to underwrite all equity and debt offerings for a period of twelve months following completion of the 2017 public offering ("Right of First Refusal"). Under the release, the Company agreed to pay the underwriter \$100,000 in cash and issue 60,000 shares of restricted common stock with a fair value of \$257,400 in exchange for a full release from all obligations related to the Right of First Refusal. The Company expensed the \$357,400 cost of the release agreement in November 2017.

See report of independent accounting firm

### ***Registered Direct/Private Placement Offerings***

On December 19, 2017, the Company closed a registered direct offering with several institutional and accredited investors for the sale of 1,280,360 shares of common stock at \$4.6925 per share for gross proceeds of \$6,008,089. Simultaneously, the Company sold the investors 640,180 immediately exercisable five and a half year warrants at \$4.63 per share. The Company paid the placement agent for the offering a fee of 7% of the gross proceeds totaling \$420,566 and issued the placement agent 89,625 immediately exercisable five-year warrants at \$5.8656 per share. The Company also reimbursed the placement agent for \$85,000 in expenses and incurred \$20,000 in other expenses. Net proceeds from the offering were \$5,482,523. The estimated fair value of the 640,180 warrants issued to the investors was \$2,407,276 and the estimated fair value of the 89,625 warrants issued to the placement agent was \$316,071.

On March 29, 2018, the Company closed a registered direct offering with an institutional and an accredited investor for the sale of 669,504 shares of common stock at \$2.985 per share for gross proceeds of \$1,998,469. Simultaneously, the Company sold to the investors 669,504 immediately exercisable five and a half year warrants at \$2.86 per share. The Company paid the placement agent for the offering a fee of 7% of the gross proceeds totaling \$139,893 and issued the placement agent 46,866 immediately exercisable five-year warrants at \$3.73125 per share. The Company also reimbursed the placement agent for \$85,000 in expenses and incurred \$10,000 in other expenses. Net proceeds from the offering were \$1,763,576. The estimated fair value of the 669,504 warrants issued to the investors was \$1,679,482 and the estimated fair value of the 46,866 warrants issued to the placement agent was \$110,511.

### ***August 2018 Offering***

On August 13, 2018, Citius closed an underwritten offering of (i) 5,521,569 units, each unit consisting of one share of common stock and one immediately exercisable five-year warrant to purchase one share at \$1.15 per share, and (ii) 2,321,569 pre-funded units, each pre-funded unit consists of one pre-funded warrant to purchase one share and one immediately exercisable five-year warrant to purchase one share at \$1.15 per share. The pre-funded warrants included in the pre-funded units are immediately exercisable at a price of \$0.01 per share and do not expire. The offering price was \$1.275 per unit and \$1.265 per pre-funded unit. The net proceeds of the offering were \$8,926,786. The Company issued underwriter warrants to purchase up to 549,020 shares at \$1.59375 per share with an estimated fair value of \$491,737. The underwriter warrants are exercisable following February 8, 2019 and expire on August 8, 2023. The estimated fair value of the 2,321,569 pre-funded warrants was \$2,630,072, and the estimated fair value of the 7,843,138 warrants included in the units and the pre-funded units issued to the investors was \$7,311,727.

### ***Unit Purchase Options***

On April 7, 2017, the Company issued a three-year Unit Purchase Option Agreement to a consultant for 38,000 units at a purchase price of \$9.00 per unit. Each unit consists of one share of common stock and a warrant to purchase one share of common stock at an exercise price of \$9.00 per share which expires on the earlier of three years after exercise of the Unit Purchase Option Agreement or April 7, 2023. The consultant provided the Company with business development and financing assistance for the three months ended June 30, 2017. The Company estimated the fair value of the unit purchase option agreement at \$104,138 and expensed it during the year ended September 30, 2017.

On June 29, 2017, the Company issued a three-year Unit Purchase Option Agreement to a consultant for 62,667 units at a purchase price of \$9.00 per unit. Each unit consists of one share of common stock and a warrant to purchase one share of common stock at an exercise price of \$9.00 per share which expires on the earlier of three years after exercise of the Unit Purchase Option Agreement or June 29, 2022. The consultant will provide the Company with business development and financing assistance through December 31, 2017. The Company estimated the fair value of the unit purchase option agreement at \$193,860 and recorded it as a prepaid expense. The Company recorded an expense of \$96,930 for this agreement during the year ended September 30, 2017 and expensed the remaining balance of \$96,930 during the year ended September 30, 2018.

See report of independent accounting firm

### Stock Option Plans

On September 12, 2014, the Board of Directors adopted the 2014 Stock Incentive Plan (the “2014 Plan”) and reserved 866,667 shares of common stock for issuance to employees, directors and consultants. On September 12, 2014, our stockholders approved the plan. Pursuant to the 2014 Plan, the Board of Directors (or committees and/or executive officers delegated by the Board of Directors) may grant stock options, stock appreciation rights, restricted stock, restricted stock units, other stock-based awards and cash-based awards. As of September 30, 2018, there were options to purchase 856,039 shares outstanding under the 2014 Plan, options to purchase 4,829 shares were exercised, and 5,799 shares were available for future grants.

On February 7, 2018, our stockholders approved the 2018 Omnibus Stock Incentive Plan (the “2018 Plan”) and the Company reserved 2,000,000 shares of common stock for issuance to employees, directors and consultants. Pursuant to the 2018 Plan, the Board of Directors (or committees and/or executive officers delegated by the Board of Directors) may grant stock options, stock appreciation rights, restricted stock, restricted stock units, other stock-based awards and cash-based awards. As of September 30, 2018, there were options to purchase 745,000 shares outstanding under the 2018 Plan and 1,255,000 shares were available for future grants.

The fair value of each stock option award is estimated on the date of grant using the Black-Scholes option pricing model. Due to its limited operating history and limited number of sales of its common stock, the Company estimated its volatility in consideration of a number of factors including the volatility of comparable public companies. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant commensurate with the expected term assumption. The expected term of stock options granted to employees and directors, all of which qualify as “plain vanilla,” is based on the average of the contractual term (generally 10 years) and the vesting period. For non-employee options, the expected term is the contractual term.

The following assumptions were used in determining the fair value of stock option grants for the years ended September 30, 2018, 2017 and 2016:

	<b>2018</b>	<b>2017</b>	<b>2016</b>
Risk-free interest rate	2.78 – 2.99 %	1.79 – 1.90 %	0.95 – 1.40 %
Expected dividend yield	0 %	0 %	0 %
Expected term	6.50 – 10 years	6.50 – 10 years	4.75 – 9 years
Expected volatility	116 %	85 – 108 %	57 – 74 %

A summary of option activity under the 2014 Plan and 2018 Plan is presented below:

	<b>Shares</b>	<b>Weighted- Average Exercise Price</b>	<b>Weighted- Average Remaining Contractual Term</b>	<b>Aggregate Intrinsic Value</b>
Outstanding at September 30, 2017	861,039	\$ 6.69		
Granted	745,000	1.63		
Exercised	—	—		
Forfeited or expired	(5,000)	3.45		
Outstanding at September 30, 2018	<u>1,601,039</u>	\$ 4.35	8.56 years	\$ 173,291
Exercisable at September 30, 2018	<u>729,675</u>	\$ 7.15	7.10 years	\$ 112,541

See report of independent accounting firm

On March 30, 2016, the Company assumed stock options to purchase 77,252 shares of common stock in connection with the acquisition of LMB. The LMB option holders received stock options to purchase 71,217 shares at an exercise price of \$0.01 per share and 6,035 shares at an exercise price of \$13.65 per share. Pursuant to the original grants, options to purchase 4,829 shares were immediately vested and options to purchase 72,423 shares vest over three years. These options all had original terms of 10 years.

On June 23, 2016, the Board of Directors granted stock options to four directors. Each director received an option to purchase 13,333 shares of common stock at an exercise price of \$12.00 per share in consideration for their services. These options vest in full on June 23, 2017 and have a term of 10 years.

In July 2016, the Board of Directors granted stock options to purchase a total of 138,267 shares to three employees at prices ranging from \$10.50 to \$13.50 per share. These options vest over terms of 19 to 36 months and have a term of 10 years.

On January 1, 2017, the Board of Directors granted stock options to purchase a total of 8,669 shares to four consultants at \$10.05 per share. These options vest over terms of 12 to 36 months and have a term of 10 years.

In September 2017, the Board of Directors granted stock options to purchase a total of 225,000 shares to 12 employees and 50,000 options to two consultants at \$3.45 per share. These options vest over terms of 12 to 36 months and have a term of 10 years.

In September 2018, the Board of Directors granted stock options to purchase a total of 520,000 shares to six employees, 75,000 options to five directors, and 80,000 options to three consultants at \$1.62 per share. In addition, the Board granted stock options to purchase 70,000 shares to a financial consultant at \$1.75 per share. These options vest over terms of 12 to 36 months and have a term of 10 years.

Stock-based compensation expense for the years ended September 30, 2018, 2017 and 2016 was \$779,701, \$986,620 and \$732,151, respectively.

At September 30, 2018, unrecognized total compensation cost related to unvested awards of \$1,425,957 is expected to be recognized over a weighted average period of 2.3 years.

See report of independent accounting firm

## Warrants

The Company has reserved 15,193,192 shares of common stock for the exercise of outstanding warrants. The following table summarizes the warrants outstanding at September 30, 2018:

	Exercise price	Number	Expiration Dates
Investor and Placement Agent Warrants	\$ 9.00	384,006	September 12, 2019
Investor Warrants	9.00	202,469	March 19, 2020 – September 14, 2020
Investor Warrants	9.00	307,778	November 5, 2020 – April 25, 2021
LMB Warrants	6.15	90,151	June 12, 2019 – March 2, 2021
LMB Warrants	9.90	8,155	September 30, 2019 – January 8, 2020
LMB Warrants	20.70	17,721	November 3, 2019 – March 6, 2020
LMB Warrants	7.50	73,883	August 18, 2020 – March 14, 2021
LMB Warrants	7.50	53,110	March 24, 2022 – April 29, 2022
Financial Advisor Warrants	3.00	25,833	August 15, 2021
2016 Offering Warrants	4.13	140,819	November 23, 2021 – February 27, 2022
Convertible Note Warrants	9.75	40,436	September 12, 2019
2017 Public Offering Warrants	4.13	1,622,989	August 2, 2022
2017 Public Offering Underwriter Warrants	4.54	65,940	February 2, 2023
December 2017 Registered Direct/Private Placement Offering Investor Warrants	4.63	640,180	June 19, 2023
December 2017 Registered Direct/Private Placement Offering Agent Warrants	5.87	89,625	December 19, 2022
March 2018 Registered Direct/Private Placement Offering Investor Warrants	2.86	669,504	October 2, 2023
March 2018 Registered Direct/Private Placement Offering Agent Warrants	3.73	46,866	March 28, 2023
August 2018 Offering Investor Warrants	1.15	7,843,138	August 14, 2023
August 2018 Offering Pre-Funded Unit Warrants	0.01	2,321,569	No expiration date
August 2018 Offering Agent Warrants	1.59	549,020	August 8, 2023
		<u>15,193,192</u>	

On March 30, 2016, the Company granted warrants to purchase 243,020 shares of common stock in connection with the acquisition of LMB. The warrants have exercise prices between \$6.15 and \$20.70 per share. All warrants were vested at March 30, 2016. The fair value of the warrants was estimated at \$1,071,172 and has been included in the purchase price of LMB.

On August 16, 2016, the Company granted warrants to purchase 66,667 shares of common stock in connection with a one-year financial advisory agreement. The warrants were vested on issuance, have an exercise price of \$3.00 per share and are exercisable on a cash or cashless basis. The fair value of the warrants was estimated at \$477,181 and recorded as a prepaid expense on the issuance date. During the years ended September 30, 2017 and 2016, the Company expensed \$417,181 and \$60,000, respectively, in connection with the agreement. During the year ended September 30, 2018, 40,834 warrants were exercised on a cashless basis resulting in the issuance of 16,547 shares of common stock.

During the year ended September 30, 2017, the Company sold 128,017 2016 Offering Units, at a price of \$6.00 per Unit, consisting of (i) one share of common stock and (ii) a warrant to purchase one share of common stock. Each 2016 Offering Warrant had an exercise price of \$8.25 and is exercisable for five years from the date of issuance. Additionally, warrants to purchase 12,802 shares of common stock were granted to the Placement Agent pursuant to the above pricing terms. On June 8, 2017, the Company entered into release agreements with the investors and as a result the Company repriced the 2016 Offering Warrants to an exercise price of \$4.125 per share on August 8, 2017.

On June 7, 2017, the Company issued a warrant to purchase 40,436 shares of common stock at \$9.75 per share in settlement of issues related to the July 31, 2014 conversion of a subordinated convertible promissory note. The Company charged the \$119,402 estimated fair value of the warrant to settlement expenses during the year ended September 30, 2017.

Effective June 16, 2017, the Company amended warrants associated with the Leonard-Meron Biosciences, Inc. 2015 private placement offering. The warrant amendments removed the exercise price reset provisions, adjusted the exercise price of the warrants to \$7.50 per share and extended the term of the warrants by three years. The estimated fair value of the warrants on June 16, 2017 after the amendments was \$250,733. As a result of the amendment, the Company recorded an incremental cost of \$71,488 as a settlement expense during the year ended September 30, 2017.

See report of independent accounting firm

See Note 7 above for descriptions of the warrants issued in the 2017 public offering, the December 2017 and March 2018 registered direct/private placement offerings, and the August 2018 offering. During the year ended September 30, 2018, 272,767 of the 2017 public offering warrants were exercised at \$4.25 per share for net proceeds of \$1,125,148.

At September 30, 2018, the weighted average remaining life of all of the outstanding warrants is 3.89 years, all warrants are exercisable, and the aggregate intrinsic value for the warrants outstanding was \$8,402,648.

### ***Common Stock Reserved***

A summary of common stock reserved for future issuances as of September 30, 2018 is as follows:

Stock plan options outstanding	1,601,039
Stock plan shares available for future grants	1,260,799
Warrants	15,193,192
Unit purchase options	201,334
<b>Total</b>	<b><u>18,256,364</u></b>

## **8. RELATED PARTY TRANSACTIONS**

The Company's headquarters were previously located in Maynard, MA in the office space of a company affiliated through common ownership. In connection with the March 30, 2016 acquisition of LMB, the Company moved its principal executive offices to Cranford, NJ. The Company did not record any revenue or expense related to the use of the Maynard, MA office space as management has determined the usage to be immaterial and the affiliate has not charged for the usage.

As of September 30, 2018 and 2017, the Company owed \$0 and \$27,637 to a company affiliated through common ownership for the expenses the related party paid on the Company's behalf and services performed by the related party.

Our Chairman of the Board, Leonard Mazur, is the cofounder and Vice Chairman of Akrimax Pharmaceuticals, LLC ("Akrimax"), a privately held pharmaceutical company specializing in producing cardiovascular and general pharmaceutical products. The Company leases office space from Akrimax (see Note 9).

Our Chairman of the Board, Leonard Mazur, and our Chief Executive Officer, Myron Holubiak, are co-founders and were significant shareholders in LMB. In connection with the acquisition of LMB, our Chairman purchased an additional 333,333 shares of the Company. See Note 5 for a description of related party debt transactions.

In connection with the 2017 Public Offering, Mr. Mazur purchased 421,400 units consisting of 421,400 shares of common stock at \$4.125 per share and 421,400 warrants at \$0.01 per warrant and converted certain notes payable to common stock (See Note 5).

In connection with the December 2017 Registered Direct/Private Placement Offering, Mr. Mazur purchased 213,106 shares of common stock at \$4.6925 per share and received 106,553 warrants exercisable at \$4.63 per share. In connection with the March 2018 Registered Direct/Private Placement Offering, Mr. Mazur purchased 167,504 shares of common stock at \$2.985 per share and received 167,504 warrants exercisable at \$2.86 per share. The purchases were made on the same terms as for all other investors.

In connection with the August 2018 offering, Mr. Mazur purchased 3,137,255 shares of common stock at \$1.275 per share and received 3,137,255 warrants exercisable at \$1.15 per share, and Mr. Holubiak purchased 784,314 shares of common stock at \$1.275 per share and received 784,314 warrants exercisable at \$1.15 per share. The purchases were made on the same terms as for all other investors.

See report of independent accounting firm

## **9. EMPLOYMENT AND CONSULTING AGREEMENTS**

### ***Employment Agreements***

On October 19, 2017, the Company and Mr. Mazur, entered into an amended employment agreement with a three-year term. Under the terms of the amended agreement, the Company is required to pay base compensation plus incentives over the employment term plus severance benefits upon the occurrence of certain events as described in the agreement.

On March 30, 2016, in connection with the acquisition of LMB, the Company entered into a three-year employment agreement with Myron Holubiak to serve as Chief Executive Officer. Upon expiration, the agreement automatically renews for successive periods of one-year. The agreement requires the Company to pay base compensation plus incentives over the employment term plus severance benefits upon the occurrence of certain events as described in the agreement.

The Company has employment agreements with certain other employees that require the Company to pay base compensation plus incentives over the employment term plus severance benefits upon the occurrence of certain events as described in the agreement.

### ***Consulting Agreements***

Effective September 1, 2014, the Company entered into three consulting agreements. Two of the agreements are for financial consulting services including accounting, preparation of financial statements and filings with the SEC. The third agreement is for financing activities, product development strategies and corporate development. The agreements may be terminated by the Company or the consultant with 90 days written notice.

Consulting expense under the agreements for the years ended September 30, 2018, 2017 and 2016 was \$422,000, \$372,000, and \$460,000, respectively. Consulting expense for the years ended September 30, 2018, 2017 and 2016 includes \$48,000, \$48,000 and \$48,000, respectively, paid to a financial consultant who is a stockholder of the Company. In addition, one financial consulting services agreement provides for the grant of options to purchase 33,333 shares of common stock contingent upon approval by the Board of Directors. The options were granted on June 1, 2015.

## **10. FDA REFUND**

On August 29, 2018, the Company received notification from the Food and Drug Administration (“FDA”) that the Company was being refunded \$818,343 of 2016 product and establishment fees because the fees paid by the Company exceeded the costs of the FDA’s review of the associated Suprenza applications. The Company recorded as other income in the statements of operations the \$818,343 receivable from the FDA as of September 30, 2018. The Company received the refund in full on October 1, 2018.

## **11. COMMITMENTS AND CONTINGENCIES**

### ***Operating Lease***

The Company leases office space from Akrimax, a related party (see Note 8), in Cranford, New Jersey at a monthly rental rate of \$2,167 pursuant to an agreement which currently expires on April 30, 2019. Rent expense for the years ended September 30, 2018, 2017 and 2016 was \$26,000, \$26,000 and \$13,002. Future minimum rentals for the year ending September 30, 2019 are \$15,167.

See report of independent accounting firm

## Legal Proceedings

The Company is not involved in any litigation that we believe could have a material adverse effect on our financial position or results of operations. There is no action, suit, proceeding, inquiry or investigation before or by any court, public board, government agency, self-regulatory organization or body pending or, to the knowledge of our executive officers, threatened against or affecting our company or our officers or directors in their capacities as such.

## 12. INCOME TAXES

There was no provision for federal or state income taxes for the years ended September 30, 2018, 2017 and 2016 due to the Company's operating losses and a full valuation reserve on deferred tax assets.

On December 22, 2017, the Tax Cuts and Jobs Act (the "Act"), was signed into law by the President of the United States. The Act includes a number of changes, including the lowering of the U.S. corporate tax rate from 35% to 21%, effective January 1, 2018, and the establishment of a territorial-style system for taxing foreign-source income of domestic multinational corporations. The Company has recognized provisional tax impacts related to the revaluation of the Company's deferred tax assets and the impact of revaluation of those deferred tax assets on the Company's valuation allowance and included those amounts in the consolidated financial statements for the year ended September 30, 2018. The actual impact of the Act may differ from the Company's estimates due to, among other things, changes in interpretations and assumptions made and guidance that may be issued as a result of the Tax Act.

The income tax benefit differs from the amount of income tax determined by applying the U.S. federal income tax rate to pretax income for the years ended September 30, 2018, 2017 and 2016 due to the following:

	<u>2018</u>	<u>2017</u>	<u>2016</u>
Computed "expected" tax benefit	(24.5%)	(35.0%)	(35.0%)
Increase (decrease) in income taxes resulting from:			
State taxes, net of federal benefit	(6.0%)	(5.2%)	(5.2%)
Permanent differences	0.0%	1.3%	4.2%
Increase in the valuation reserve	30.5%	38.9%	36.0%
	<u>0.0%</u>	<u>0.0%</u>	<u>0.0%</u>

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

	<u>September 30, 2018</u>	<u>September 30, 2017</u>
Deferred tax assets:		
Net operating loss carryforward	\$ 8,962,000	\$ 7,123,000
Stock-based compensation	1,350,000	1,425,000
Valuation allowance	(10,312,000)	(8,548,000)
Deferred tax assets	<u>\$ —</u>	<u>\$ —</u>

The Company has recorded a valuation allowance against deferred tax assets as the utilization of the net operating loss carryforward and other deferred tax assets is uncertain. During the years ended September 30, 2018, 2017 and 2016, the valuation allowance increased by \$1,764,000, \$4,044,000 and \$2,989,000, respectively. The increase in the valuation allowance during the years ended September 30, 2018, 2017 and 2016 was primarily due to the Company's net operating loss offset by the decrease in the effective U.S. federal income tax rate from 35% to 21%. At September 30, 2018, the Company has a net operating loss carryforward of approximately \$29,344,000 which begins expiring in 2034.

## 13. SUBSEQUENT EVENTS

### *Exercise of Pre-Funded Unit Warrants*

On October 3, 2018 the Company received a notice of exercise for the purchase of 1,600,000 shares of common stock at \$0.01 per share pursuant to its pre-funded unit warrants issued in the August 2018 offering. Proceeds from the exercise were \$16,000.

See report of independent accounting firm

## **Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

None.

### **Item 9A. Controls and Procedures**

#### **Disclosure Controls and Procedures**

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), is recorded, processed, summarized and reported within the specified time periods and accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding disclosure.

Our Chief Executive Officer (who is our principal executive officer) and Chief Financial Officer (who is our principal financial officer and principal accounting officer), evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act) as of September 30, 2018, the end of our fiscal year. In designing and evaluating disclosure controls and procedures, we recognize that any disclosure controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving the desired control objective. As of September 30, 2018, based on the evaluation of these disclosure controls and procedures, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective in ensuring that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC’s rules and forms.

#### **Management’s Annual Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act. Because of its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of our financial statements would be prevented or detected. Under the supervision of our Chief Executive Officer and Chief Financial Officer, the Company conducted an evaluation of the effectiveness of our internal control over financial reporting as of September 30, 2018 using the criteria established in Internal Control—*Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) (2013 Framework).

Based on this evaluation, management has concluded that our internal controls were effective and that we maintained effective controls over our financial reporting as of September 30, 2018.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

#### **Changes in Internal Controls over Financial Reporting**

In the fourth quarter of fiscal 2018, as part of our then ongoing efforts to remediate the material weaknesses in our internal controls over financial reporting, we completed documenting various policies and procedures, and implemented sufficient separation of duties by developing appropriate review, signoffs and grants of authority, as well as consolidating key financial functions which are administered solely by employees at our Company’s Cranford, New Jersey office. As a result of these remedial efforts, our management was able to determine that our internal controls over financial reporting were effective as of September 30, 2018.

Other than as described above, there were no other changes in our internal controls over financial reporting during the fourth quarter of fiscal 2018 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

### **ITEM 9B. Other Information.**

None.

### PART III

#### ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

We have adopted a written Code of Ethics and Business Conduct that applies to our directors, officers and all employees. We intend to disclose any amendments to, or waivers from, our code of ethics and business conduct that are required to be publicly disclosed pursuant to rules of the SEC by filing such amendment or waiver with the SEC. This code of ethics and business conduct can be found in the “Investors - Corporate Governance” section of our website, [www.citiuspharma.com](http://www.citiuspharma.com).

The other information required by this Item concerning our directors and executive officers is incorporated by reference to the section captioned “Proposal No. 1—Election of Directors” and “Corporate Governance” to be contained in our proxy statement related to the 2019 Annual Meeting of Stockholders (the “Proxy Statement”), which information is expected to be filed with the SEC within 120 days of the end of our fiscal year pursuant to General Instruction G(3) of Form 10-K. The information required by this Item concerning compliance with Section 16(a) of the Exchange Act by our directors, executive officers and persons who own more than 10% of our outstanding common stock is incorporated by reference from the section captioned “Section 16(a) Beneficial Ownership Reporting Compliance” to be contained in the Proxy Statement.

#### ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item concerning directors and executive compensation is incorporated by reference from the sections captioned “Director Compensation” and “Executive Compensation”, respectively, to be contained in the Proxy Statement.

#### ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth the indicated information as of September 30, 2018 with respect to our equity compensation plans:

<b>Plan Category</b>	<b>Number of securities to be issued upon exercise of outstanding options, warrants and rights</b>	<b>Weighted-average exercise price of outstanding options, warrants and rights</b>	<b>Number of securities remaining available for future issuance under equity compensation plans</b>
<b>Equity compensation plans approved by security holders</b>			
2014 Stock Incentive Plan	856,039	\$ 6.71	5,799
2018 Omnibus Stock Incentive Plan	745,000	\$ 1.63	1,255,000
<b>Total</b>	<b>1,601,039</b>	<b>\$ 4.35</b>	<b>1,260,799</b>

Our equity compensation plans consist of the Citius Pharmaceuticals, Inc. 2018 Omnibus Stock Incentive Plan and 2014 Stock Incentive Plan, which were both approved by our stockholders. We do not have any equity compensation plans or arrangements that have not been approved by our stockholders.

The other information required by this Item is incorporated by reference to the information under the section captioned “Security Ownership of Certain Beneficial Owners and Management” contained in the Proxy Statement.

#### ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this Item is incorporated by reference to the information under the section captioned “Certain Relationships and Related Transactions” and “Proposal No. 1—Election of Directors” to be contained in the Proxy Statement.

#### ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information required by this Item is incorporated by reference to the information under the section captioned “Auditor and Audit Committee Matters” to be contained in the Proxy Statement.

**AMENDED AND RESTATED EMPLOYMENT AGREEMENT**

This Employment Agreement (the “Agreement”) is made as of October 19, 2017 (the “Effective Date”), by and between Citius Pharmaceuticals, Inc. (the “Employer”), and Leonard L. Mazur (the “Executive”). In consideration of the mutual covenants contained in this Agreement, the Employer and the Executive agree as follows:

1. Employment. The Employer agrees to employ the Executive and the Executive agrees to be employed by the Employer on the terms and conditions set forth in this Agreement.

2. Term. The initial term (the “Initial Term”) of this Agreement shall begin as of the Effective Date and shall continue for three (3) years, until the third anniversary of the Effective Date, unless sooner terminated by either party as set forth below. Effective upon the expiration of the Initial Term and of each Renewal Term (as defined below), if any, the term of this Agreement shall automatically renew for successive periods of one-year (each, a “Renewal Term”) unless the Employer gives written notice to the Executive at least ninety (90) days prior to the end of the Initial Term or at least ninety (90) days prior to the end of any Renewal Term that the term of the Agreement shall not be further extended. As used in this Agreement, the “Term” shall refer to the Initial Term and any Renewal Term.

3. Capacity. The Executive shall serve as Executive Chairman of the Employer’s Board (as defined below). The Executive shall also serve the Employer in such other or additional offices as the Executive and Employer’s Board of Directors (the “Board”) mutually may agree, provided that such other or additional offices are consistent with the Executive’s position and the terms of Section 6 below. In such capacity or capacities, the Executive shall serve as chair of the board of directors, develop agendas for board meetings, participate in the Company’s executive meetings, represent the Company to the investor community, lead capital raise efforts, engage in strategic business opportunities and negotiations for the Company, and perform such other services and duties in connection with the business, affairs and operations of the Employer and consistent with his position(s) and the terms of Section 6 below; provided, however, it is understood and agreed that, in the event of a dispute between the Employer and Akrimax (as defined in Section 6 below and/or Prezamax (as defined in Section 6 below), the Executive shall not be required to provide any services to the Employer related to such dispute. Employer shall use its best efforts to cause the Executive to be elected as a voting member of its Board throughout the Term and shall include him in the management slate for election as a director at every stockholders meeting during the Term at which his term as a director would otherwise expire. The Executive agrees to accept election, and to serve during the Term, as a member of the Board without any compensation therefore other than as specified in this Agreement.

4. Compensation and Benefits. The regular compensation and benefits payable to the Executive under this Agreement shall be as follows:

(a) Salary. For all services rendered by the Executive under this Agreement, the Employer shall pay the Executive a salary (the “Salary”) at the annual rate of two hundred and fifty thousand dollars (\$250,000). The Salary shall be payable in periodic installments in accordance with the Employer’s usual practice for its senior executives.

---

(b) Annual Milestone Bonus. Executive will receive a discretionary bonus on each anniversary of the Effective Date during the Term (the "Annual Milestone Bonus") in an amount up to fifty percent (50%) of his then current Base Salary based on the attainment by the Executive of certain financial, clinical development and business milestones (the "Milestones") as established annually by the Board (or a committee thereof), after consultation with the Executive. The Annual Milestone Bonus shall be payable as a lump-sum payment by no later than March 15 of the year following the close of the year to which such bonus relates.

(c) Regular Benefits. The Executive shall also be entitled to participate in any medical insurance plans, life insurance plans, disability income plans, retirement plans, vacation and other paid time off plans and policies, expense reimbursement plans and policies and other benefit plans and policies, which the Employer may from time to time establish and have in effect for all or most of its senior executives. Such participation shall be subject to the terms of the applicable plan documents and policies, and applicable law. Nothing contained in this Agreement shall be construed to create any obligation on the part of the Employer to establish any such plan or to maintain the effectiveness of any such plan which may be in effect from time to time. The Executive shall be entitled to four (4) weeks of paid vacation each calendar year, which vacation shall be taken in accordance with the Employer's vacation plans and policies.

(d) Equity Grants.

(i) On the September 12, 2014, the Employer granted the Executive an option to purchase 3,300,000 shares of common stock of the Employer, at an exercise price of \$0.45 cents per share (the "Option"). The Company executed a 1 for 15 reverse stock split on June 9, 2017, the ("Split"). The impact of the split was such that the Option now consisted of 220,000 shares of common stock at an exercise price of \$6.75 per share. The Option has fully vested as of September 12, 2017.

(ii) On the September 15, 2017, the Citius Board of Directors granted the Executive an option to purchase 40,000 shares of common stock of the Employer, at an exercise price of \$3.45 cents per share (the "2017 Option"). The options will vest 1/3 on the one year anniversary of the Vesting Commencement Date, and then vest monthly at the end of each month for the next two years in equal amounts for the remaining 2/3 of the options, provided that the Optionee provides Continuous Service to the Company as of each such vesting date.

(iii) If application of the vesting percentages causes a fractional Share or Unit, such fractional Share shall be rounded down to the nearest whole Share or Unit for each vesting date except for the last vesting date, on which the Option shall become exercisable for the full remainder of the Shares.

(iv) Notwithstanding anything to the contrary, upon a Change of Control (as defined in Section 8), all options granted to the Executive by the Employer, including, but not limited to the Option, shall immediately accelerate and become exercisable or non-forfeitable as of the consummation of such Change of Control.

(v) The Option was granted pursuant to and subject to the terms and conditions established in the Citius Pharmaceuticals, Inc. 2014 Stock Incentive Plan, a copy of which is attached hereto as Exhibit A (“Stock Incentive Plan”) and the award agreement (the “Option Award Agreement”) in the form attached hereto as Exhibit B.

(vi) Subject to the terms of this Section 4(d), the Executive shall also be entitled to any other rights and benefits with respect to option awards, to the extent and upon the terms provided in the employee option plan or any agreement or other instrument attendant thereto pursuant to which such options were granted.

(e) Taxation of Payments and Benefits. The Employer shall undertake to make deductions, withholdings and tax reports with respect to payments and benefits under this Agreement to the extent that it reasonably and in good faith believes that it is required to make such deductions, withholdings and tax reports. Payments under this Agreement shall be in amounts net of any such deductions or withholdings. Nothing in this Agreement shall be construed to require the Employer to make any payments to compensate the Executive for any adverse tax effect associated with any payments or benefits or for any deduction or withholding from any payment or benefit.

(f) Exclusivity of Salary and Benefits. The Executive shall not be entitled to any payments or benefits other than those provided under this Agreement, or as otherwise agreed between the Executive and the Employer.

5. Principal Place of Business. Executive shall perform services under this Agreement in the Employer’s office space located in New Jersey, USA. At all times during the Term of this Agreement, Employer shall provide Executive with appropriate and reasonable administrative support for the performance of his services under this Agreement.

6. Extent of Service. During the Executive’s employment under this Agreement, the Executive shall, subject to the direction and supervision of the Board, devote the Executive’s best efforts and business judgment, skill and knowledge to the advancement of the Employer’s interests and to the discharge of the Executive’s duties and responsibilities under this Agreement; provided, however, that the Executive may engage in the Permitted Activities (as defined below) both during and outside of regular business hours, provided that such Permitted Activities during regular business hours do not impair the Executive’s ability to fulfill the Executive’s duties and responsibilities under this Agreement. “Permitted Activities” means (a) serving on the board of directors or similar governing body (and any committee thereof) of IntelliCell Biosciences (“IntelliCell”), Leonard Meron Biosciences (“Meron”), Akrimax Pharmaceuticals (“Akrimax”), Prenzamax LLC (“Prenzamax”), Rouses Point Pharmaceuticals, LLC (“Rouses”), Novellus, Inc. (“Novellus”), their respective subsidiaries and any of their respective successors and assigns (together, the “Excluded Businesses”), (b) serving as interim Chief Executive Officer of Novellus, (c) continuing to have an equity interest in and/or investing in the Excluded Businesses, and (d) activities in connection with the operations or affairs of the Excluded Businesses. During the Executive’s employment under this Agreement, the Executive shall not engage in any other competing business activity, except for such other business activities as may be previously approved by the Board; provided, however, for the avoidance of doubt, the Permitted Activities shall in no event be deemed a “competing business activity” In addition to the express understanding that Executive may engage in the Permitted Activities, nothing in this Agreement shall be construed as preventing the Executive from:

(a) investing the Executive’s assets in any company or other entity in a manner not prohibited by Section 9(d) and in such form or manner as shall not require any activities on the Executive’s part in connection with the operations or affairs of the companies or other entities in which such investments are made or otherwise impair the Executive’s ability to fulfill the Executive’s duties and responsibilities under this Agreement; or

(b) engaging in religious, charitable or other community or non-profit activities that do not impair the Executive's ability to fulfill the Executive's duties and responsibilities under this Agreement.

7. Termination. The Executive's employment under this Agreement shall terminate under the following circumstances.

(a) Termination by the Employer for Cause. The Executive's employment under this Agreement may be terminated for Cause without further liability (other than to pay or provide the Accrued Benefits) on the part of the Employer effective immediately upon a vote of the Board and written notice to the Executive. Only the following shall constitute "Cause" for such termination:

(i) any act of fraud, dishonesty or gross willful misconduct that is demonstrated to have caused material harm to the Employer, as reasonably determined in good faith by the Board;

(ii) the indictment of the Executive for the Executive's commission of a (x) felony or (y) misdemeanor involving moral turpitude or fraud.

(iii) failure of the Executive to make a good faith effort to perform the Executive's material duties and responsibilities lawfully assigned or delegated by the Board under this Agreement, which failure continues uncured (in the reasonable judgment of the Board, acting in good faith) for more than thirty (30) days after written notice describing the particulars of such alleged failure is given to the Executive by the Board; or

(iv) a material and willful breach by the Executive of any of the Executive's material obligations under this Agreement, which breach continues uncured (in the reasonable judgment of the Board acting in good faith) for more than thirty (30) days, after written notice describing the particulars of such alleged breach is given to the Executive by the Board.

For purposes of this definition of "Cause," no act or failure to act, on the part of the Executive, shall be considered "willful" unless it is done, or omitted to be done, by the Executive in bad faith or without reasonable belief that the Executive's action or omission was in the best interests of the Employer.

(b) Termination by the Executive for Good Reason. Subject to the payment of Termination Benefits pursuant to Section 8(c) or Section 8(d), as applicable, the Executive's employment under this Agreement may be terminated by the Executive for Good Reason, provided that the Executive first provides written notice ("Good Reason Notice") to the Board not later than forty-five (45) days following the initial occurrence of the act or failure to act that constitutes Good Reason setting forth the act or failure to act that constitutes Good Reason. The Employer shall have a period of thirty (30) days in which it may correct the act or failure to act that constitutes the grounds for Good Reason as set forth in the Executive's Good Reason Notice (the "Good Reason Cure Period"). If the Employer does not correct the act or failure to act, the Executive must terminate his employment for Good Reason within thirty (30) days after the end of the Good Reason Cure Period, in order for the termination to be considered a Good Reason termination. Good Reason shall mean the occurrence of one or more of the following, without the Executive's consent:

(i) a reduction of the Executive's Salary, other than a reduction of the Executive's Salary by a percentage that is not greater than 10% in connection with a general reduction in base compensation that affects all of the Employer's executives in substantially the same proportions;

(ii) a material diminution in the Executive's authority, responsibilities or duties;

(iii) a material relocation of the geographic location at which the Executive must perform services for the Employer, which, for purposes of this Agreement, means the relocation of the geographic location at which the Executive must perform services for the Employer to a location more than fifty (50) miles from such geographic location prior to the relocation ("Relocation");

(iv) the Executive is not elected or re-elected, as applicable, to serve on the Board; or

(v) a material breach by the Employer of this Agreement, including, but not limited to Section 13 below.

(c) Termination by the Employer Without Cause. Subject to the payment of Termination Benefits pursuant to Section 8(c) or Section 8(d), as applicable, the Executive's employment under this Agreement may be terminated by the Employer without Cause upon at least thirty (30) days advance written notice to the Executive.

(d) Voluntary Termination by the Executive without Good Reason. The Executive's employment may be terminated by the Executive voluntarily without Good Reason upon at least thirty (30) days advance written notice to the Employer.

(e) Death. The Executive's employment with the Employer shall terminate upon his death.

(f) Disability. If the Executive shall incur a “Disability” so as to be unable to perform the essential functions of the Executive’s then existing position or positions under this Agreement, with or without reasonable accommodation, the Board may relieve him from any responsibilities during the period of such Disability. Notwithstanding any such removal or reassignment, the Executive shall continue to receive the Executive’s full Salary (less any Disability pay or sick pay benefits to which the Executive may be entitled under the Employer’s plans or policies) and benefits under Section 5 of this Agreement (except to the extent that the Executive may be ineligible for one or more such benefits under applicable plan terms) for up to ninety (90) or more consecutive days or one hundred eighty (180) days in the aggregate during any consecutive twelve (12) month period, and the Executive’s employment may be terminated by the Employer on account of Disability at any time thereafter. For purposes of this Agreement, “Disability” shall mean the Executive is eligible to receive long-term disability benefits under the Employer’s long-term disability plan, provided, however, that if the Employer does not maintain a long-term disability plan, “Disability” shall mean a medical determination by physician(s) selected by the Employer to whom the Executive or the Executive’s guardian has no reasonable objections that due to the Executive’s illness or other physical or mental disability, the Executive was or will be unable to substantially perform the essential functions of the Executive’s employment under this Agreement, with or without reasonable accommodation, for a period of ninety (90) or more consecutive days or for one hundred eighty (180) days in the aggregate during any consecutive twelve (12) month period. Nothing in this Section 7(g) shall be construed to waive the Executive’s rights, if any, under existing law including, without limitation, the Family and Medical Leave Act of 1993, 29 U.S.C. §2601 *et seq.* and the Americans with Disabilities Act, 42 U.S.C. §12101 *et seq.*

#### 8. Compensation Upon Termination.

(a) Termination Generally. If the Executive’s employment with the Employer is terminated for any reason, the Employer shall pay or provide to the Executive (or to his authorized representative or estate) any earned but unpaid Salary (which earned, but unpaid Salary shall be paid on or before the time required by law, but in no event more than sixty (60) days after the last day of the Executive’s employment), unpaid expense reimbursements (which unpaid expense reimbursements shall be paid on or before the time required by law, but in no event more than sixty (60) days after the last day of the Executive employment), accrued but unused vacation (which accrued but unused vacation shall be paid on or before the time required by law, but in no event more than sixty (60) days after the last day of the Executive’s employment), any bonus Executive has earned under Section 4(b) of the Agreement (which bonus shall be paid according to the time set forth in Section 4(b) above), and any vested benefits the Executive may have under any employee benefit plan of the Employer (which benefits shall be paid and/or provided in accordance with the terms of the applicable plan) (the “Accrued Benefit”).

(b) Voluntary Termination without Good Reason. If the Executive elects voluntarily to terminate his employment without Good Reason in accordance with Section 7(b), the Employer shall have no further obligation to the Executive other than to pay and/or provide his Accrued Benefit through the date of termination (which Accrued Benefit will be paid and/or provided in accordance with Section 8(a) above).

(c) Termination by the Employer Without Cause or by the Executive for Good Reason. In the event of a termination of the Executive's employment with the Employer by the Employer without Cause or by the Executive for Good Reason, and subject to the Executive's execution and non-revocation of a release of any and all legal claims in the form annexed hereto as Exhibit C (the "Release"), in addition to the Accrued Benefit, the Employer shall provide to the Executive the following termination benefits ("Termination Benefits"):

(i) continuation of the Executive's Salary at the highest annual rate applicable within the four (4) months preceding the date of termination;

(ii) provided the Executive timely elects continued coverage under any of Employer's group health, dental, vision or prescription drug plan benefits in which he participates on the date of his termination of employment to the extent authorized by and consistent with 29 U.S.C. § 1161 et seq. (commonly known as "COBRA"), monthly reimbursement for COBRA premiums paid by the Executive for such continued coverage, less the amount that the Executive would be required to contribute for such coverage if the Executive were an active employee of the Employer;

(iii) immediate vesting in any options that would have vested at the next immediate vesting event following the date the Executive's employment is terminated, provided, however, that the Executive must continue to comply with his obligations under this Agreement to be eligible for such vesting, including, without limitation, his post-employment obligations set forth in Section 9 below.

The Termination Benefits set forth in Sections 8(c)(i) and (ii) above shall continue effective for twelve (12) months after the date of termination (the "Termination Benefits Period"). The Salary continuation payments under Section 8(c)(i) will be paid in installments in accordance with the Employer's regular payroll practices, commencing with the first regular payroll date on or following sixty (60) days following the date of the Executive's termination of employment, and the first payment will include any payments not yet paid during the period between the date of termination of employment and the date of the first payment.

(d) Termination by the Employer Without Cause or by the Executive for Good Reason and Within Ninety (90) Days Prior to a Change of Control or Within Two Years Following a Change of Control. Notwithstanding the foregoing, in the event of a termination of the Executive's employment with the Employer by the Employer without Cause or by the Executive for Good Reason and within ninety (90) days prior to a Change of Control or within two (2) years following a Change of Control, and subject to the Executive's execution and non-revocation of the Release, the Executive will receive (in addition to the Accrued Benefit) all of the payments and benefits as set forth in Section 8(c), except that the Termination Benefits Period shall be eighteen (18) months instead of twelve (12) months, and any such options shall immediately vest and be exercisable in full and, in the event of a termination on or within two (2) years following a Change of Control, the Salary continuation payments under Section 8(c)(i) shall be paid in a lump sum no later than sixty (60) days following the termination of the Executive's employment.

(e) Termination by the Employer with Cause. If the Executive's employment is terminated by the Employer with Cause, the Employer shall have no further obligation to the Executive other than payment of his Accrued Benefit.

(f) Additional Limitation.

(i) In the event that it shall be determined that any benefit or payment in the nature of compensation (within the meaning of Section 280G(b)(2) of the Code) to or for the benefit of the Executive under this Agreement, or any other plan, arrangement, or agreement with the Employer (the "Payments") would constitute a "parachute payment" within the meaning of Section 280G of the Code and (but for this sentence) be subject to the tax (the "Excise Tax") imposed by Section 4999 of the Code (or any similar tax that may hereafter be imposed), the aggregate present value of the Payments under this Agreement, and such other plan, arrangement or agreement with the Employer, shall be reduced (but not below zero) to the Reduced Amount. The "Reduced Amount" shall be either (A) the largest portion of the Payments that would result in no portion of the Payments being subject to the Excise Tax or (B) the largest portion, up to and including the total, of the Payments, whichever amount, after taking into account all applicable federal, state and local employment taxes, income taxes, and the Excise Tax, results in the Executive's receipt, on an after-tax basis, of the greater amount of the Payments notwithstanding that all or some portion of the Payments may be subject to the Excise Tax. If a reduction in payments or benefits constituting "parachute payments" is necessary so that the Payments equal the Reduced Amount, the Employer shall reduce the Payments by first reducing or eliminating any cash payments (with the Payments to be made furthest in the future being reduced first), then by reducing or eliminating accelerated vesting of stock options or similar awards, and then by reducing or eliminating any other remaining Payments, provided that with each category the reduction shall be done on a basis resulting in the highest amount retained by the Executive; and provided, further, that to the extent permitted by Section 409A of the Code and Sections 280G and 4999 of the Code, if a different reduction procedure would be permitted without violating Section 409A of the Code or losing the benefit of the reduction under Sections 280G and 4999 of the Code, the Executive may designate a different order of reduction.

(ii) All determinations to be made under this Section 8(f) shall be made by an independent certified public accounting firm selected by the Employer and approved by the Executive (the "Accounting Firm"), which shall provide its determinations and any supporting calculations both to the Employer and the Executive within ten (10) days following the Change of Control. For purposes of this Section 8(f), the Accounting Firm shall take into account all applicable federal, state and local income and employment taxes and the Excise Tax (all computed at the Executive's actual marginal tax rate). Any determinations by the Accounting Firm in accordance with this Section 8(f) shall be binding upon the Employer and the Executive. All of the fees and expenses of the Accounting Firm in performing the determinations referred to in this Section 8(f) shall be borne solely by the Employer.

(iii) Notwithstanding anything herein to the contrary, for purposes of Section 409A of the Internal Revenue Code of 1986, as amended (the "Code"), if the Executive is a "specified employee" of a publicly held corporation at his termination date, the postponement provisions of Section 409A of the Code, as described in Section 18(a) below, shall apply, if applicable. Additionally, notwithstanding anything herein to the contrary, in no event shall the timing of the Executive's execution of the Release, directly or indirectly, result in the Executive designating the calendar year of payment, and if a payment that is subject to execution of the Release could be made in more than one taxable year, payment shall be made in the later taxable year. The Employer's liability for Salary continuation pursuant to Section 8(c)(i) shall be reduced by the amount of any severance actually paid to the Executive pursuant to any severance pay plan of the Employer. Nothing in Section 8(c) or Section 8(d) shall be construed to affect the Executive's right to receive COBRA continuation entirely at the Executive's own cost to the extent that the Executive may continue to be entitled to COBRA continuation after the Executive's right to reimbursements under Section 8(c)(ii) or Section 8(d) ceases.

(iv) As used in this Agreement, “Change of Control” means (x) a change in ownership of the Employer under clause (A) below or (y) a change in the ownership of a substantial portion of the assets of the Employer under clause (B) below:

(A) Change in the Ownership of the Employer. A change in the ownership of the Employer shall occur on the date that any one person, or more than one person acting as a group (as defined in clause (C) below), acquires ownership of capital stock of the Employer that, together with capital stock held by such person or group, constitutes more than 50 percent of the total fair market value or total voting power of the capital stock of the Employer. However, if any one person or more than one person acting as a group, is considered to own more than 50 percent of the total fair market value or total voting power of the capital stock of the Employer, the acquisition of additional capital stock by the same person or persons shall not be considered to be a change in the ownership of the Employer. An increase in the percentage of capital stock owned by any one person, or persons acting as a group, as a result of a transaction in which the Employer acquires capital stock in the Employer in exchange for property will be treated as an acquisition of stock for purposes of this paragraph.

(B) Change in the Ownership of a Substantial Portion of the Employer’s Assets. A change in the ownership of a substantial portion of the Employer’s assets shall occur on the date that any one person, or more than one person acting as a group (as defined in clause (C) below), acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) assets from the Employer that have a total gross fair market value equal to or more than 80 percent of the total gross fair market value of all of the assets of the Employer immediately prior to such acquisition or acquisitions. For this purpose, gross fair market value means the value of the assets of the Employer, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets. There is no Change of Control under this clause (B) when there is a transfer to an entity that is controlled by the shareholders of the Employer immediately after the transfer, as provided below in this clause (B). A transfer of assets by the Employer is not treated as a change in the ownership of such assets if the assets are transferred to (1) a shareholder of the Employer (immediately before the asset transfer) in exchange for or with respect to its capital stock, (2) an entity, 50 percent or more of the total value or voting power of which is owned, directly or indirectly, by the Employer, (3) a person, or more than one person acting as a group, that owns, directly or indirectly, 50 percent or more of the total value or voting power of all the outstanding capital stock of the Employer, or (4) an entity, at least 50 percent of the total value or voting power of which is owned, directly or indirectly, by a person described in clause (B)(3) of this paragraph. For purposes of this clause (B), a person’s status is determined immediately after the transfer of the assets.

(C) Persons Acting as a Group. For purposes of clauses (A) and (B) above, persons will not be considered to be acting as a group solely because they purchase or own capital stock or purchase assets of the Employer at the same time. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of assets or capital stock, or similar business transaction with the Employer. If a person, including an entity, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of assets or capital stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only with respect to the ownership in that corporation before the transaction giving rise to the change and not with respect to the ownership interest in the other corporation. For purposes of this paragraph, the term “corporation” shall have the meaning assigned such term under Treasury Regulation section 1.280G-1, Q&A-45.

(D) Each of clauses (A) through (C) above shall be construed and interpreted consistent with the requirements of Section 409A and any Treasury Regulations or other guidance issued thereunder. For the avoidance of doubt, the Transaction or a similar financing or recapitalization, including a financing or recapitalization that results in any person or entity acquiring a majority interest of the Employer’s outstanding equity, shall not be a “Change of Control” for purposes of this Agreement.

#### 9. Confidential Information, Noncompetition and Cooperation.

(a) Confidential Information. As used in this Agreement, “Confidential Information” means information belonging to the Employer which is of value to the Employer in the course of conducting its business and is maintained as confidential by the Employer and the disclosure of which could result in a competitive or other disadvantage to the Employer. Confidential Information includes, without limitation, financial information, reports, and forecasts; inventions, improvements and other intellectual property; trade secrets; know-how; designs, processes or formulae; software; market or sales information or plans; customer lists; and business plans, prospects and opportunities (such as possible acquisitions or dispositions of businesses or facilities) which have been discussed or considered by the management of the Employer. Confidential Information includes information developed by the Executive in the course of the Executive’s employment by the Employer, as well as other information to which the Executive may have access in connection with the Executive’s employment. Confidential Information also includes the confidential information of others with which the Employer has a business relationship. Notwithstanding the foregoing, Confidential Information does not include: (i) information in the public domain unless due to breach of the Executive’s duties under Section 9(b); (ii) information known to the Executive prior to such information being disclosed to the Executive in connection with his employment hereunder; (iii) is disclosed to the Executive at any time other than in the course of the Executive’s performance of his duties as an employee of Employer, by any third party not bound at the time of the disclosure directly or indirectly, by any confidentiality agreement with Employer.

(b) Confidentiality. The Executive understands and agrees that the Executive's employment creates a relationship of confidence and trust between the Executive and the Employer with respect to all Confidential Information. At all times, both during the Executive's employment with the Employer and after its termination, the Executive will keep in confidence and trust all such Confidential Information, and will not use or disclose any such Confidential Information without the written consent of the Employer, except (i) as may be necessary in the ordinary course of performing the Executive's duties to the Employer, (ii) to enforce any rights or defend any claims hereunder or under any other agreement to which the Executive is a party, provided that such disclosure is relevant to the enforcement of such rights or defense of such claims and is only disclosed to the extent necessary in the formal proceedings related thereto, or (iii) when required to do so by a court of law, by any governmental agency having supervisory authority over the business of the Employer or by any administrative or legislative body (including a committee thereof) with jurisdiction to order the Executive to divulge, disclose or make accessible such information, provided that the Executive shall give prompt written notice to the Employer of such requirement, disclose no more information than is so required, and reasonably cooperate with any attempt by the Employer to obtain a protective order or similar treatment.

(c) Documents, Records, etc. All documents, records, data, apparatus, equipment and other physical property, whether or not pertaining to Confidential Information, which are furnished to the Executive by the Employer or are produced by the Executive in connection with the Executive's employment will be and remain the sole property of the Employer. The Executive will return to the Employer all such materials and property as and when requested by the Employer. In any event, the Executive will return all such materials and property immediately upon termination of the Executive's employment for any reason. The Executive will not retain with the Executive any such material or property or any copies thereof after such termination.

(d) Noncompetition and Nonsolicitation.

(i) During the term of the Executive's employment with the Employer hereunder and for nine (9) months thereafter, the Executive will not, directly or indirectly, whether as owner, partner, shareholder, consultant, agent, employee, co-venturer or otherwise, engage, participate, assist or invest in any Competing Business (as defined below in this Section 9(d) below).

(ii) During the term of the Executive's employment with the Employer and for two (2) years thereafter, the Executive will not, directly or indirectly, whether as owner, partner, shareholder, consultant, agent, employee, co-venturer or otherwise; (A) attempt to employ, recruit or otherwise solicit, induce or influence any person to leave employment with the Employer (other than terminations of employment of employees undertaken in the course of the Executive's employment with the Employer and/or in the Executive's capacity as a member of the Board); and (B) solicit or encourage any customer or supplier to terminate or otherwise modify adversely its business relationship with the Employer; provided, that neither (1) the general advertisement for employees or service providers (*i.e.*, not targeted toward any of the Employer's employees) nor (2) the Executive being named as an reference for an employee of the Employer and responding to ordinary course inquiries made of the Executive by prospective employers or service recipients of such employee in connection with such reference so long as the reference is for employment with an employer that does not engaging a Competing Business with Employer, shall be deemed a violation of this Section 9(d)(ii). Further, for the avoidance of doubt, nothing in this Section 9(d)(ii) shall be deemed to prohibit senior level general solicitations in connection with any activities that are not prohibited by Section 9(d)(i) above shall not be deemed a violation of this Section 9(d)(ii).

The Executive understands that the restrictions set forth in this Section 9(d) are intended to protect the Employer's interest in its Confidential Information and established employee, customer and supplier relationships and goodwill, and agrees that such restrictions are reasonable and appropriate for this purpose. For purposes of this Agreement, the term "Competing Business" shall mean a biopharmaceuticals business conducted anywhere in the United States which is focused on therapies for obesity, or topical therapies for hemorrhoids and/or other anal rectal diseases or disorders, or on other therapeutic categories to be identified and added to Addendum A to this Agreement from time to time during the employment of the Executive; provided, however, in no event shall any of the Excluded Businesses be deemed a Competing Business, and provided further, however, that any other therapeutic categories identified and added to Addendum A of this Agreement shall relate to therapeutic categories with respect to which the Employer is actively conducting business or which are actively under development by the Employer. Notwithstanding the foregoing, the Executive may own up to one percent (1%) of the outstanding stock of a publicly held corporation which constitutes or is affiliated with a Competing Business.

(e) Third-Party Agreements and Rights. The Executive hereby confirms that the Executive is not bound by the terms of any non-competition and/or non-solicitation agreement with any previous employer, other current employer or other party which prohibits or materially limits the performance by the Executive of his duties to Employer hereunder. The Executive represents to the Employer that the Executive's execution of this Agreement, the Executive's employment with the Employer and the performance of the Executive's proposed duties for the Employer will not violate any obligations the Executive may have to any such previous employer, other current employer or other party. In the Executive's work for the Employer, the Executive will not disclose or make use of any information in violation of any agreements with or rights of any such previous employer, current employer or other party, and the Executive will not bring to the premises of the Employer any copies or other tangible embodiments of non-public information belonging to or obtained from any such previous employment, concurrent employment or other party.

(f) Litigation and Regulatory Cooperation. During and after the Executive's employment, the Executive shall reasonably cooperate with the Employer in the defense or prosecution of any claims or actions now in existence or which may be brought in the future against or on behalf of the Employer which relate to events or occurrences that transpired while the Executive was employed by the Employer. The Executive's cooperation in connection with such claims or actions shall include, but not be limited to, being reasonably available to meet with counsel to prepare for discovery or trial and to act as a witness on behalf of the Employer at mutually convenient times. During and after the Executive's employment, the Executive also shall reasonably cooperate with the Employer in connection with any investigation or review of any federal, state or local regulatory authority as any such investigation or review relates to events or occurrences that transpired while the Executive was employed by the Employer. The Employer shall reimburse the Executive for any reasonable out-of-pocket expenses incurred in connection with the Executive's performance of obligations pursuant to this Section 9(f), including Executive's attorneys' fees to the extent the Executive reasonably determines that the Executive should be represented by his own counsel.

(g) Injunction. The Executive agrees that it would be difficult to measure any damages caused to the Employer which might result from any breach by the Executive of the promises set forth in this Section 9, and that in any event money damages would be an inadequate remedy for any such breach. Accordingly, subject to Section 10 of this Agreement, the Executive agrees that if the Executive breaches, or proposes to breach, any portion of this Agreement, the Employer shall be entitled, in addition to all other remedies that it may have, to seek an injunction or other appropriate equitable relief to restrain any such breach without showing or proving any actual damage to the Employer.

10. Arbitration of Disputes. Any controversy or claim arising out of or relating to this Agreement or the breach thereof or otherwise arising out of the Executive's employment or the termination of that employment (including, without limitation, any claims of unlawful employment discrimination whether based on age or otherwise) shall, to the fullest extent permitted by law, be settled by arbitration in any forum and form agreed upon by the parties or, in the absence of such an agreement, under the auspices of the American Arbitration Association ("AAA") in Boston, Massachusetts in accordance with the Employment Dispute Resolution Rules of the AAA, including, but not limited to, the rules and procedures applicable to the selection of arbitrators. In the event that any person or entity other than the Executive or the Employer may be a party with regard to any such controversy or claim, such controversy or claim shall be submitted to arbitration subject to such other person or entity's agreement. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction thereof. This Section 10 shall be specifically enforceable. Notwithstanding the foregoing, this Section 10 shall not preclude either party from pursuing a court action for the sole purpose of obtaining a temporary restraining order or a preliminary injunction in circumstances in which such relief is appropriate, provided that any other relief shall be pursued through an arbitration proceeding pursuant to this Section 10. The Employer shall bear the cost of all arbitration fees, but each party shall be responsible for its own attorneys' fees.

11. Consent to Jurisdiction. To the extent that any court action is permitted consistent with or to enforce Section 10 of this Agreement, the parties hereby consent to the jurisdiction of the Superior Court of the State of New Jersey and the United States District Court for the District of New Jersey. Accordingly, with respect to any such court action, the Executive (a) submits to the personal jurisdiction of such courts; (b) consents to service of process; and (c) waives any other requirement (whether imposed by statute, rule of court, or otherwise) with respect to personal jurisdiction or service of process.

12. Integration. This Agreement, the Stock Incentive Plan and the Option Award Agreement constitute the entire agreement between the parties with respect to the subject matter hereof and supersede all prior agreements between the parties with respect to any related subject matter.

13. Indemnification; Liability Insurance. The Employer shall indemnify and hold Executive harmless to the fullest extent permitted by the laws of the Employer's state of organization or incorporation in effect at the time against and in respect of any and all actions, suits, proceedings, claims, demands, judgments, costs, expenses (including advancement of reasonable attorney's fees), losses, and damages resulting from the Executive's performance of the Executive's duties and obligations with the Employer. Executive will be entitled to be covered, both during and, while potential liability exists, by the insurance policies the Employer may elect to maintain generally for the benefit of officers and directors of the Employer against all costs, charges and expenses incurred in connection with any action, suit or proceeding to which the Executive may be made a party by reason of being an officer or director of the Employer in the same amount and to the same extent as the Employer covers its other officers and directors. Without limitation of the foregoing, the Employer agrees to continue and maintain a directors' and officers' liability insurance policy covering the Executive in an amount, and on terms and conditions (including without limitation, with respect to scope, exclusions, sub-amounts and deductibles), no less favorable to him than (x) the coverage the Employer provides other senior executives and directors from time to time or, if greater, (y) the coverage provided to senior executives and directors on the Effective Date. These obligations shall survive the termination of Executive's employment with the Employer.

14. Assignment; Successors and Assigns, etc. Except as otherwise set forth in this Section 14, neither the Employer nor the Executive may make any assignment of this Agreement or any interest herein, by operation of law or otherwise, without the prior written consent of the other party. Notwithstanding the foregoing, the Employer may assign its rights under this Agreement without the consent of the Executive to a successor in the event that the Employer shall effect a reorganization, consolidate with or merge into any other corporation, partnership, organization or other entity, or transfer all of substantially all of its properties or assets to any other corporation, partnership, organization or other entity and such successor shall assume and agree to perform this Agreement in the same manner and to the same extent that the Employer would be required to perform it if no such succession had taken place. As used in this Agreement, "Employer" shall mean the Employer and any such successor which assumes and agrees to perform the duties and obligations of the Employer under this Agreement by operation of law or otherwise. This Agreement shall inure to the benefit of and be binding upon the Employer and the Executive, their respective successors, executors, administrators, heirs and permitted assigns.

15. Enforceability. If any portion or provision of this Agreement (including, without limitation, any portion or provision of any section of this Agreement) shall to any extent be declared illegal or unenforceable by a court of competent jurisdiction, then the remainder of this Agreement, or the application of such portion or provision in circumstances other than those as to which it is so declared illegal or unenforceable, shall not be affected thereby, and each portion and provision of this Agreement shall be valid and enforceable to the fullest extent permitted by law.

16. Waiver. No waiver of any provision hereof shall be effective unless made in writing and signed by the waiving party. The failure of any party to require the performance of any term or obligation of this Agreement, or the waiver by any party of any breach of this Agreement, shall not prevent any subsequent enforcement of such term or obligation or be deemed a waiver of any subsequent breach.

17. Notices. Any notices, requests, demands and other communications provided for by this Agreement shall be sufficient if in writing and delivered in person or sent by a nationally recognized overnight courier service or by registered or certified mail, postage prepaid, return receipt requested, to the Executive at the last address the Executive has filed in writing with the Employer or, in the case of the Employer, at its main offices, attention of the Board, and shall be effective on the date of delivery in person or by courier or three (3) days after the date mailed.

18. Section 409A.

(a) This Agreement is intended to comply with Section 409A of the Code and its corresponding regulations, or an exemption, and payments may only be made under this Agreement upon an event and in a manner permitted by Section 409A of the Code, to the extent applicable. To the extent that any provision in this Agreement is ambiguous as to its compliance with Section 409A of the Code, or to the extent any provision in this Agreement must be modified to comply with Section 409A of the Code, such provision shall be read in such a manner so that no payment due to the Executive shall be subject to an "additional tax" within the meaning of Section 409A(a)(1)(B) of the Code. Severance benefits under the Agreement are intended to be exempt from Section 409A of the Code under the "short-term deferral" exception, to the maximum extent applicable, and then under the "separation pay" exception, to the maximum extent applicable. Notwithstanding anything in this Agreement to the contrary, if required by Section 409A of the Code, if the Executive is considered a "specified employee" for purposes of Section 409A of the Code and if payment of any amounts under this Agreement is required to be delayed for a period of six (6) months after separation from service pursuant to Section 409A of the Code, payment of such amounts shall be delayed as required by Section 409A of the Code, and the accumulated amounts shall be paid in a lump sum payment within ten (10) days after the end of the six (6) month period. If the Executive dies during the postponement period prior to the payment of benefits, the amounts withheld on account of Section 409A of the Code shall be paid to the personal representative of the Executive's estate within sixty (60) days after the date of the Executive's death.

(b) To the extent required to comply with Section 409A of the Code, any Termination Benefits or other payments to be made upon a termination of employment under this Agreement may only be made upon a "separation from service" as defined under Section 409A of the Code. For purposes of Section 409A of the Code, each payment hereunder shall be treated as a separate payment and the right to a series of installment payments under this Agreement shall be treated as a right to a series of separate payments. In no event may the Executive, directly or indirectly, designate the calendar year of a payment. All reimbursements and in-kind benefits provided under the Agreement shall be made or provided in accordance with the requirements of Section 409A of the Code.

19. Amendment. This Agreement may be amended or modified only by a written instrument signed by the Executive and by a duly authorized representative of the Employer.

20. Governing Law. This is a New Jersey contract and shall be construed under and be governed in all respects by the laws of the state of New Jersey, without giving effect to the conflict of laws principles of such state. With respect to any disputes concerning federal law, such disputes shall be determined in accordance with the law as it would be interpreted and applied by the United States Court of Appeals for the Third Circuit.

21. Counterparts. This Agreement may be executed in any number of counterparts, each of which when so executed and delivered shall be taken to be an original; but such counterparts shall together constitute one and the same document.

IN WITNESS WHEREOF, this Agreement has been executed as a sealed instrument by the Employer, by its duly authorized member, and by the Executive, as of the Effective Date.

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER  
PURSUANT TO SECTION 302 OF THE  
SARBANES-OXLEY ACT OF 2002**

I, Myron Holubiak, certify that:

1. I have reviewed this report on Form 10-K of Citius Pharmaceuticals, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

- a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
- c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
